Aesthetics of the Virtual

Roberto Diodato 2012-11-15

Arguing that the virtual body is something new—namely, an entity that from an ontological perspective has only recently entered the world—Roberto Diodato considers the implications of this kind of body for aesthetics. Virtual bodies insert themselves into the space opened up by the famous distinction in Aristotle’s *Physics* between natural and artificial beings—they are both. They are beings that are simultaneously

events; they are images that are at once internal and external; they are ontological hybrids that exist only in the interaction between logical-computational text and human bodies endowed with technological prostheses. Pursuing this line of thought, Diodato reconfigures classic aesthetic concepts such as mimesis, representation, the relation between illusion and reality, the nature of images and imagination, and the theory of sensory knowledge. Internationalisation Strategies

George Chrysochoidis

1997-04-12 This volume, published in association with the UK chapter of the Academy of International Business, again contains a number of contributions from leading academics. The book looks at the environmental influences on internationalisation and considers the strategic options available to firms.

Literature and Media

Maryla Hopfinger 2020 This book discusses the changes in contemporary culture at the turn of the 20th and 21st centuries in Poland on the example of relationships between literature and the media. The author adopts an interdisciplinary approach combining literary and media studies with the perspectives of social communication, anthropology and sociology of culture.

The Fine Art of Co-Producing Per Neumann 2002
We Can Have Peace in the Holy

Land Jimmy Carter 2010-02-18

President Carter has been a student of the biblical Holy Land all his life. For the last three decades, as president of the United States and as founder of The Carter Center, he has studied the complex and interrelated issues of the region's conflicts and has been actively involved in reconciling them. He knows the leaders of all factions in the region who will need to play key roles, and he sees encouraging signs among them. Carter describes the history of previous peace efforts and why they fell short. He argues persuasively that the road to a peace agreement is now open and that it has broad international and regional support. Most of all, since there will be no progress without courageous and sustained U.S. leadership, he says the time for progress is now. President Barack Obama is committed to a personal effort to exert that leadership, starting early in his administration. This is President Carter's call for action, and he lays out a practical and achievable path to peace.

Collaborative Therapy Harlene Anderson 2012-10-12
Collaborative Therapy: Relationships and Conversations That Make a Difference provides in-depth accounts of the everyday practice of postmodern collaborative therapy, vibrantly illustrating how dialogic conversation can transform lives, relationships, and entire communities. Pioneers and leading professionals from diverse disciplines, contexts, and cultures describe in detail what they do in their therapy and training practices, including their work with psychosis, incarceration, aging, domestic violence, eating disorders, education, and groups. In addition to the therapeutic applications, the book demonstrates the usefulness of a postmodern collaborative approach to the domains of education, research, and organizations.

Social Work in Europe

Charlotte Williams 2013-09-13
It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to

issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. The Russian Civil War Evan

Mawdsley 2017-09-07 The Russian Civil War of 1917-1920, out of which the Soviet Union was born, was one of the most significant events of the twentieth century. The collapse of the Tsarist regime and the failure of the Kerensky Provisional Government nearly led to the complete disintegration of the Russian state. This book, however, is not simply the story of that collapse and the rebellion that accompanied it, but of the painful and costly reconstruction of Russian power under a Soviet regime. Evan Mawdsley's lucid account of this vast and complex subject explains in detail the power struggles and political manoeuvres of the war, providing a balanced analysis of why the Communists were victors. This edition includes illustrations, a new preface and an extensively updated bibliography.

relaciones interpersonales que mantenemos con los otros en el marco de unos determinados contextos socioculturales, físicos y virtuales. ¿Cómo pueden hacer frente los profesionales de lo social y lo cultural a la incerteza e imprevisibilidad de dichas relaciones? Este libro analiza los principales elementos que intervienen en la relación socioeducativa, se cuestiona algunas de las ideas tradicionales sobre la acción e intervención socioeducativas y genera nuevos enfoques y perspectivas sobre la acción de los profesionales. Unos enfoques que les ayudarán a descubrir los límites y las oportunidades que caracterizan sus quehaceres profesionales, pero que, sobre todo, les proporcionarán nuevas herramientas teóricas y metodológicas para afrontar una tarea tan compleja como la de acompañar a las personas en las situaciones y problemáticas de su vida cotidiana.

Corpus Linguistics Tony McEney 2011-10-06 Corpus

linguistics is the study of language data on a large scale - the computer-aided analysis of very extensive collections of transcribed utterances or written texts. This textbook outlines the basic methods of corpus linguistics, explains how the discipline of corpus linguistics developed and surveys the major approaches to the use of corpus data. It uses a broad range of examples to show how corpus data has led to methodological and theoretical innovation in linguistics in general. Clear and detailed explanations lay out the key issues of method and theory in contemporary corpus linguistics. A structured and coherent narrative links the historical development of the field to current topics in 'mainstream' linguistics. Practical tasks and questions for discussion at the end of each chapter encourage students to test their understanding of what they have read and an extensive glossary provides easy access to definitions of technical terms used in the text.

The Rhyme of the Flying Bomb Mervyn Peake 1973 This fills an important gap in the canon of Peake's works in print. Although written after the Second World War, The poem uses it for its theme. While its central characters, The sailor And The child are symbolic, this was not consciously planned. Pe
Cyclic and lexical phonology Jerzy Rubach 1984-01-01 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with

the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics, from syntax to information structure, from mathematical linguistics to studies of the lexicon.

The Biopolitics of Gender Jemima Repo 2015-10-01 This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Cervical, Breast and Prostate Cancer (Black and White)

iConcept Press 2014-07-16

Cervical cancer and breast cancer are two of the most common cancers found in

women. Cervical cancer is when cancer arises from the cervix.

Early on there are typically no symptoms. Later symptoms may include abnormal vaginal bleeding, pelvic pain or pain during sex. Breast cancer is when cancer develops from breast tissue. Signs of breast

cancer may include a lump in the breast, a change in breast shape, dimpling of the skin, fluid coming from the nipple, or a red scaly patch of skin. Prostate cancer is when cancer develops in the prostate, a gland in the male reproductive system. It may initially cause no symptoms. In later stages it can cause difficulty urinating, blood in the urine, or pain in the pelvis, back or when urinating. This book provides some latest research and findings on breast cancer, cervical cancer and prostate cancer. The aim of this book is to serve as an important reference book for individuals working in biomedical laboratories, and for clinical professionals. There are totally 13 chapters in this book. Chapter 1 proposes an outlook on different endoscopic surgical procedures to treat cervical cancer, using traditional laparoscopy and robotics. Chapter 2 reviews the clinical results of carbon ion radiotherapy (C-ion RT) for uterine cervical cancer. Carbon ion RT has been established as a safe short-term treatment for

locally advanced uterine cervical cancer. Chapter 3 summarises chrysin inhibits proliferation, induces apoptosis and reduce angiogenesis in most tested cancer cells, including cervical cancer cells. Chapter 4 shows that involving physicians in the promotion of public health programs and initiatives is a viable option. Chapter 5 summarizes the published findings about the controversial role of METCAM, a cell adhesion molecule, in the progression of human breast cancer. Chapter 6 focuses on the biology of "neu" in breast cancer - the potential mechanisms that may contribute to tumor resistance and the numerous uncertainties that persist despite the bona-fide progress made in treating this particular subtype of breast cancer. Chapter 7 describes the mechanisms by which estrogen can exert its role in estrogenresponsive cells, focusing on specific aspects of estrogen receptor signaling. Moreover, this chapter shows how some of the proteins involved in estrogen receptor

signaling can be used as predictive markers in breast cancer and describes a proposed clinical study related to the combined use of two drugs (bortezomib and tamoxifen) as therapeutic agents for estrogen receptor negative breast cancers. Chapter 8 summarizes the recent studies indicating that AngII facilitates breast cancer metastasis by contributing to the cross-talk between cancer cells and the host stroma. Chapter 9 focuses on a rationale pharmaceutical development along with a detailed understanding of biological effects so as to accelerate the incorporation of nanocarriers in breast cancer therapy. Chapter 10 summarizes the mTOR pathway and the clinical results in breast cancer treatment, relating them to results obtained using cultured MCF-7 breast cancer tamoxifen resistant sublines. Chapter 11 discusses how to develop a standard extraction method, yielding tomato products which are suitable for cell cultures, and enable

product comparison of different tomato varieties. Chapter 12 describes principles and processes that are involved in investigating biological or clinical problems with nuclear magnetic resonance (NMR) based metabolomics - an approach that involves the global analysis of metabolites. The authors use prostate cancer as a case study to outline the processes, applications and potential of metabolomics for inform scientists and clinicians. Chapter 13 discusses the epidemiology, screening, diagnosis and treatment options of prostate cancer and its association with osteoporosis.

structured reference work, Bernd W. Wirtz gives an answer to all these issues and provides the reader with helpful guidance. Although, 'Business Model Management' is first and foremost a scientific reference book, which comprehensively addresses the theory of business models, with his book Bernd W. Wirtz also turns to practitioners. Not least, the many clearly analyzed case studies of companies in different industries contribute to this practical relevance. My conclusion: 'Business Model Management' is an informative and worthwhile read, both for students of business administration as a textbook as well as for experienced strategists and decision makers in the company as a fact-rich, practical compendium." Matthias Müller, Chief Executive Officer Porsche AG (2010-2015), Chief Executive Officer (2015-2018) Volkswagen AG "In dynamic and complex markets a well thought out business model can be a critical factor for the success of a company. Bernd Wirtz vividly

conveys how business models can be employed for strategic competition and success analysis. He structures and explains the major theoretical approaches in the literature and practical solutions in an easy and understandable way. Numerous examples from business practice highlight the importance of business models in the context of strategic management. The book has the potential to become a benchmark on the topic business models in the German-speaking world." Hermann-Josef Lamberti, Member of the Board Deutsche Bank AG 1999-2012/ Member of the Board of Directors, Airbus Group "The business environment has become increasingly complex. Due to changing conditions, the executive board of a company is confronted with growing challenges and increasing uncertainty. presents the concept of the structured discussion of the own business model. Business models present operational service processes in aggregated form. This holistic approach channels the attention of management, supports a sound understanding of relationships and facilitates the adaption of the business to changing conditions. The management of business models is thus an integrated management concept. Through the conceptual presentation of complex issues the author makes a valuable contribution to the current literature. In particular, the referenced case studies from various industries make the book clear and very applicable to practice." Immigrant Entrepreneurship

Beata Glinka 2020-06-07

Immigration is currently one of the most vivid challenges the European Union faces. Ways of introducing new migrants to society and economy pose significant challenges, thus some guidelines for the policy design towards migrations are in need. This book points out patterns of approaches leading to entrepreneurial activities, implemented by the immigrants from the Far East: China, Vietnam, South Korea, India, and Philippines. At these stage comparisons with other countries are both possible and necessary, as many countries all over the world face challenges connected with defining migration policies. From the studies included in the book, readers will gain first-hand knowledge about immigrant entrepreneurship in Poland against the Western

European or USA background of similar processes described by researchers in other countries. The areas covered in the studies include the main reasons for starting new ventures and the sources of opportunities, processes of defining customers and factors influencing the choice between an ethnic and local business, immigrants' approaches to building market position, defining success and development, as well as the issues of cultural, institutional, legal and economic differences. The studies show that significant differences in entrepreneurial activities appear between the first and second generations of immigrants. They also depict how entrepreneurial activities help in assimilation processes, as well as in building ties between the immigrants and host societies. Moreover, the study will deepen the understanding of entrepreneurial activities of immigrants in countries that are traditionally considered to be less attractive targets for

Using Corpora in the Language Learning Classroom

Gena R. Bennett
2010 The goal of this book is to make the ideas of corpus linguistics accessible to teachers and, most important, provide ideas, instruction, and opportunities for teachers to use the applications of corpus linguistics in their classrooms. *Using Corpora in the Language Learning Classroom* is intended for graduate students who are studying applied linguistics or TESOL, for teacher-trainers working with language

instructors, and for practicing language teachers who want to better understand corpus linguistics and how to incorporate it into their classroom. The book has three sections: (1) a general introduction to corpus linguistics, which contains a brief look at the theory and principles of corpus linguistics; (2) a section that reviews corpus-influenced materials and commonly used corpora; and (3) a set of corpus-designed activities that rely on several tools (MICASE, COCA, TextSTAT, for example) to teach a variety of language skills. This book does not intend to provide a complete theoretical foundation for corpus linguistics, but it does aim to provide its readers with the basic theoretical underpinnings and tools needed to work with corpora in the classroom in such a way that they are able to more effectively and efficiently help students to acquire a second language.

Corpora in Language Teaching and Learning

Yvonne Alexandra Breyer 2011

This book highlights the potential and the challenges of corpora in language education with a particular focus on the teacher's perspective. For this purpose, the study explores the relevance of the corpus approach to central paradigms underlying contemporary language education.

Furthermore, a critical analysis investigates the persisting gap between research findings and their implementation in teaching practices. As a result, key factors in advancing the popularisation of corpora in language education are identified. A survey and a case study verify this gap and, importantly, underline the pivotal role of adequate teacher education if corpus-based language teaching is to make any significant impact on current teaching practices.
