Literature and ELT: Louis Sachar's "Holes" Verena Schörkhuber 2013-01-02 Lesson Plan from the year 2012 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,0, University of Vienna (Institut für Anglistik und Amerikanistik), course: Literature and ELT (Fachdidaktik-Kurs), language: English, abstract: Bei dieser Arbeit für den Fachdidaktik-Kurs "Literature and ELT" handelt es sich um eine Didaktisierung des Abenteuerromans "Holes" von Louis Sachar (ab 4./5. Lernjahr) mit einigen außergewöhnlichen Ideen zu Übungen/Aktivitäten rund um "Holes" (Dauer ca. 4 St.), welche auch auf andere literarische Werke angewandt werden können (creating wanted posters, telephone conversations with the author, ...). Inhalt: Introduction: Why teach literature (or Literature?) in ELT; Choice of text; Work plan for four lessons; Conclusion; Bibliography; Appendix/Work sheets: 'dig it', character sketch, 'mad lib', discuss-decide-survive, filling in the holes: questions, create your own 'wanted poster', reading log. Auszug: Choice of text We shouldn't teach great books; we should teach a love of reading. (B. F. Skinner) I have chosen the novel Holes by Louis Sachar with the quotation above in mind: even though it might not be classified as one of the 'great books', i.e. of '(high) Literature', it is definitely one of those books that can serve to 'teach a love of reading'. Holes is the exciting story of Stanley Yelnats (mind the palindrome!), an overweight boy who is

unjustly sent to Camp Green Lake, a boys' juvenile detention centre. Stanley knows that this is due to a curse on his 'no-good-dirty-rotten-pig-stealing-great-great-grandfather', who did not fulfil a promise he had made to Madame Zeroni. At the camp, Stanley and six other boys are forced to dig holes every day in order to pay their debt to society. However, Stanley soon finds out that there is more than 'character building' going on [...]. The novel and its main themes (friendship, racism, justice, fate, etc.) can be exploited in many appealing ways for classroom reading. [...] In the open learning sequence I have prepared, two basic approaches to reading a book in class are incorporated. First, there is the 'classical' approach with its well-established, successful activities, whereby the focus of assessment is (as is usual on an upper-secondary level) on both language and content. On the other hand, the activities on the second work sheet focus on the themes dealt with in the book. Since friendship, bullying, racism, etc. are issues in (nearly) every teenager's life, it can be motivating for the students to deal with these topics from a personal point of view, in a creative way. The activities on both work sheets are designed in a way that allows the students to plan which tasks to do when themselves.

Polin: Studies in Polish Jewry Volume 29 Natalia Aleksion 2016-12-29
Historiography formed an unusually important component of the popular culture and heritage of east European Jewry in the late nineteenth and early twentieth centuries. This was a period of social, economic, and political upheaval, and for the emerging class of educated Jews the writing and reading of Jewish history provided not only intellectual but also emotional and moral sustenance. Facing an insecure future became easier with an understanding of the past, and of the Jewish place in that past. This volume is devoted to the development of Jewish historiography in the three east European centres—Congress Poland, the Russian empire, and Galicia—that together contained the majority of world Jewry at that time. Drawing widely on the multilingual body of scholarly and popular literature that emerged in that turbulent environment, the contributors to this volume attempt to go beyond the established paradigms in the study of Jewish historiography, and specifically to examine the relationship between the writing of Jewish history and of non-Jewish history in eastern Europe. In doing so they expose the tension between the study of the Jewish past in a communal setting and in a wider, regional, setting that located Jews firmly in the non-Jewish political, economic, and cultural environment. They also explore the relationship between ‘history’—seen as the popular understanding of the past—and ‘scholarly history’—interpretation of the past through the academic study of the sources, which lays claim to objectivity and authority. The development of Jewish historical scholarship grew out of the new intellectual climate of the Haskalah, which encouraged novel modes of thinking about self and others and promoted critical enquiry and new approaches to traditional sources. At the same time, however, in response to what the traditionalists perceived as secular research, an Orthodox historiography

also emerged, driven not only by scholarly curiosity but also by the need to provide a powerful counterweight in the struggle against modernity. In fact, east European Jewish historiography has undergone many methodological, thematic, and ideological transformations over the last two centuries. Even today, east European Jewish historiography revisits many of the questions of importance to scholars and audiences since its emergence: how Jews lived, both within the narrow Jewish world and in contact with the wider society; the limits of Jewish insularity and integration; expressions of persecution and anti-Jewish violence; and also Jewish contributions to the societies and states of eastern Europe. Many challenges still remain: questions of the purpose of the research, its ideological colouring, and its relevance for contemporary Jewish communities. The fruit of research in many disciplines and from different methodological points of view, this volume has much to offer scholars of modern Jewry trying to understand how east European Jews saw themselves as they struggled with the concepts of modernity and national identity and how their history continues to be studied and discussed by an international community of scholars.

Life Histories of Etnos Theory in Russia and Beyond David G. Anderson 2019-02-25
The idea of etnos came into being over a hundred years ago as a way of understanding the collective identities of people with a common language and shared traditions. In the twentieth century, the concept came to be associated with Soviet state-building, and it fell sharply out of favour. Yet outside the academy, etnos-style arguments not only persist, but are a vibrant part of regional anthropological traditions. *Life Histories of Etnos Theory in Russia and Beyond* makes a powerful argument for reconsidering the importance of etnos in our understanding of ethnicity and national identity across Eurasia. The collection brings to life a rich archive of previously unpublished letters, fieldnotes, and photographic collections of the theory's early proponents. Using contemporary fieldwork and case studies, the volume shows how the ideas of these ethnographers continue to impact and shape identities in various regional theatres from Ukraine to the Russian North to the

Manchurian steppes of what is now China. Through writing a life history of these collectivist concepts, the contributors to this volume unveil a world where the assumptions of liberal individualism do not hold. In doing so, they demonstrate how notions of belonging are not fleeting but persistent, multi-generational, and bio-social. This collection is essential reading for anyone interested in Russian and Chinese area studies. It will also appeal to historians and students of anthropology and ethnography more generally.

The Women's Liberation Movement in Russia Richard Stites

The author's history begins with the feminist, nihilist, and populist impulses of the 1860s and 1870s, and leads to the social mobilization campaigns of the early Soviet period.
