The Electrification of Russia, 1880-1926 Jonathan Coopersmith 2016-11-01 The Electrification of Russia, 1880-1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

Stanislavsky in Practice Vreneli Farber 2008 Stanislavsky in Practice focuses on the course of study pursued today by aspiring actors in Russia and on the philosophy that informs this curriculum. It draws on extensive observation during the academic year 2000-2001 of the actor training program of the St. Petersburg State Academy of Theatre Arts (SPGATI), one of the three most prestigious theatrical institutes in Russia, and on interviews of a wide array of individuals in the Academy. Although the years since 1991 have witnessed many changes in theater and in actor training - sources of funding, administration, choice of repertoire, new methodologies, etc. - there remains much continuity with the past. The core of this continuity is the Stanislavsky tradition, which nevertheless has been affected by the views of post-Soviet Russia. The developments in actor training from 1991 to 2001 reflect the challenges and problems faced by other institutions in the arts and sciences. In other words, the phenomenon of continuity and discontinuity with the past is characteristic of other institutions in Russia, cultural as well as scientific and educational.

Geospatial Thinking Marco Painho 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a th competitive review process. The 13 AGILE conference call for fu- papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this - lume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Car- th graphy, this book is associated to the 13 AGILE Conference on G- graphic Information Science, held in 2010 in Guimarães, Portugal, under the title "Geospatial Thinking". The efficient use of geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial concualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Appli- tions.

Borderlands Biography Beata Halicka 2021-10 Beata Halicka's masterly narrated biography is the story of an extraordinary man and leading intellectual in the Polish-American community. Z. Anthony Kruszewski was first a Polish scout fighting in World War II against the Nazi occupiers, then Prisoner of War/Displaced Person in Western Europe. He stranded as a penniless immigrant in post-war America and eventually became a world-renowned academic. Kruszewski's almost incredible life stands out from his entire generation. His story is a microcosm of the 20th-century history, covering various theatres and incorporating key events and individuals. Kruszewski walks a stage very few people have even stood on, both as an eye-witness at the centre of the Second World War, and later as vice-president of the Polish American Congress, and a professor and political scientist at world-class universities in the USA. Not only did he become a pioneer and a leading figure in Borderland Studies, but he is a borderlander in every sense of the word.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Anarchy and Art Allan Antliff 2007-04-01 One of the powers of art is its ability to convey the human aspects of political events. In this fascinating survey on art, artists, and anarchism, Allan Antliff interrogates critical moments when anarchist artists have confronted pivotal events over the past 140 years. The survey begins with Gustave Courbet's activism during the 1871 Paris Commune (which established the French republic) and ends with anarchist art during the fall of the Soviet empire. Other subjects include the French neoimpressionists, the Dada movement in New York, anarchist art during the Russian Revolution, political art of the 1960s, and gay art and politics post-World War II. Throughout, Antliff vividly explores art's potential as a vehicle for social change and how it can also shape the course of political events, both historic and present-day; it is a book for the politically engaged and art aficionados alike. Allan Antliff is the author of *Anarchist Modernism*.

Plast: Ukrainian Scouting, a Unique Story Orest Subtelny 2016-12-01 In this book, the renowned historian Orest Subtelny, who wrote *Ukraine: A History*, describes to us how, in 1911, a small group of teachers, whose people lived under foreign rule, at the crossroads of empires, took Baden Powell's idea, adapted it to their circumstances and formed a scouting organization for the betterment of Ukrainian youth and to provide hope to the Ukrainian nation. The organization was buffeted by history — repression, war, emigration, dispersement throughout the world — and finally found renewal in a free Ukraine. It was an amazing journey, truly a unique story.
