The Electrification of Russia, 1880-1926 Jonathan Coopersmith 2016-11-01
The Electrification of Russia, 1880-1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both

the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

G. Smith 1998-01-01

CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists,

Eastern European

Mathematics Education in

the Decades of Change

Alexander Karp

2020-05-04 This

contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe, exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes, little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed, the analyzed processes are complex and vary across the states. Accordingly, this book touches on many factors--including differences in cultures and traditions – that find expression in the teaching of mathematics. Specifically, this volume seeks to explore

what changes there were in education in general and in the position of mathematics in school education in these years, and how these changes may be explained and documented; what changes there were in the content of mathematics education and its assessment, and how were they motivated and adopted; what new textbooks appeared and what new methodological ideas were offered in them; how and why mathematics teacher education and/or professional development changed; what was the role (if any) of foreign influences on mathematics education, etc. The book will be of interest to both researchers in mathematics education and practitioners - teachers, as well as a broader audience of historians and educators exploring the political

aspects of education.

Nobility and Privilege in Late Imperial Russia

Seymour Becker 1988-06

The transformation of the Russian nobility between 1861 and 1914 has often been attributed to the anachronistic attitudes of its members and their failure to adapt to social change. Becker challenges this idea of "the decline of the nobility." He argues that the privileged estate responded positively to change and greatly influenced their nation's political and economic destiny.

Russian and Soviet Health Care from an International Perspective

Susan Grant 2017-02-20

This collection compares Russian and Soviet medical workers – physicians, psychiatrists and nurses, and examines them within an

international framework that challenges traditional Western conceptions of professionalism and professionalization through exploring how these ideas developed amongst medical workers in Russia and the Soviet Union. Ideology and everyday life are examined through analyses of medical practice while gender is assessed through the experience of women medical professionals and patients. Cross national and entangled history is explored through the prism of health care, with medical professionals crossing borders for a number of reasons: to promote the principles and advancements of science and medicine internationally; to serve altruistic purposes and support international health care initiatives; and to

escape persecution. Chapters in this volume highlight the diversity of experiences of health care, but also draw attention to the shared concerns and issues that make science and medicine the subject of international discussion.

objective of the book is
to allocate the grass

National Identities in Soviet Historiography

Harun Yilmaz 2015-02-20

Under Stalin's totalitarian leadership of the USSR, Soviet national identities with historical narratives were constructed. These constructions envisaged how nationalities should see their imaginary common past, and millions of people defined themselves according to them. This book explains how and by whom these national histories were constructed and focuses on the crucial episode in the construction of

national identities of Ukraine, Azerbaijan and Kazakhstan from 1936 and 1945. A unique comparative study of three different case studies, this book reveals different aims and methods of nation construction, despite the existence of one-party rule and a single overarching official ideology. The study is based on work in the often overlooked archives in the Ukraine, Azerbaijan, and Kazakhstan. By looking at different examples within the Soviet context, the author contributes to and often challenges current scholarship on Soviet nationality policies and Stalinist nation-building projects. He also brings a new viewpoint to the debate on whether the Soviet period was a project of developmentalist modernization or merely

a renewed 'Russian empire'. The book concludes that the local agents in the countries concerned had a sincere belief in socialism—especially as a project of modernism and development—and, at the same time, were strongly attached to their national identities. Claiming that local communist party officials and historians played a leading role in the construction of national narratives, this book will be of interest to historians and political scientists interested in the history of the Soviet Union and contemporary Eastern Europe, the Caucasus and Central Asia.

It asks questions such as will 'Dearing' prove to be little more than a stop-gap? What will be the balance of power between education institutions,

the state and the private sector? What are the realities behind 'lifelong learning', and what form will it take if it steps out of the realms of theory?

Soviet Cinematography, 1918-1991 Michael R. Greenberg 2021-12-17
With a historical sweep that recent events have made definitive, the authors examine the influence of Soviet ideology on the presentation of social reality in films produced in the Soviet Union between the October Revolution and the final days of glasnost. Within the framework of an introduction that lays out the conceptual terminology used to describe that shifting ideological landscape, the authors analyze both the social groups appearing in the films and the relations of film directors and other

film makers to state censorship and ideological control. *The Decembrist Myth in Russian Culture* L. Trigos 2009-12-21 This book is the first interdisciplinary treatment of the cultural significance of the Decembrists' mythic image in Russian literature, history, film and opera in a survey of its deployment as cultural trope since the original 1825 rebellion and through the present day. Translation in Russian Contexts Brian James Baer 2017-07-28 This volume represents the first large-scale effort to address topics of translation in Russian contexts across the disciplinary boundaries of Slavic Studies and Translation Studies, thus opening up new perspectives for both fields. Leading scholars from Eastern and Western

Europe offer a comprehensive overview of Russian translation history examining a variety of domains, including literature, philosophy and religion. Divided into three parts, this book highlights Russian contributions to translation theory and demonstrates how theoretical perspectives developed within the field help conceptualize relevant problems in cultural context in pre-Soviet, Soviet, and post-Soviet Russia. This transdisciplinary volume is a valuable addition to an under-researched area of translation studies and will appeal to a broad audience of scholars and students across the fields of Translation Studies, Slavic Studies, and Russian and Soviet history.

develops his
interpretation of the

dramatically underlines
