English as a Foreign Language for Deaf and Hard-of-Hearing Persons Ewa Domagała-Zysk 2016-09-23 Deaf and hard-of-hearing students form a specific group of foreign language learners. They need to use foreign languages just like their hearing peers if they want to enjoy the same benefits of globalization and technical advancements of today, yet they cannot take part in the same foreign language education. As sign language users, lip-readers or persons relying on hearing aids or cochlear implants in their everyday communication, they need special support in learning a foreign language. This book has been written by teachers and researchers involved in teaching English as a foreign language (EFL) to deaf and hard-of-hearing students in various different European countries, including the Czech Republic, France, Hungary, Norway, Poland, and Serbia. The chapters mirror both the authors’ personal journeys through this field and give insight into various aspects of empirical research into the foreign language acquisition of hearing-impaired learners. They discuss mainly the issue of specific methodology for teaching EFL vocabulary, grammar, reading, writing and speaking to deaf and hard-of-hearing persons and the challenge of effective communication during the classes via sign language, cued speech or the oral approach. Special chapters are also devoted to EFL teachers’ experience in special schools for the deaf. Educators interested in practical advice, responses to challenges and worked-out solutions to problems will particularly welcome this book as a useful source of ideas. It will also help novice teachers embarking on their careers in English language education for deaf and hard-of-hearing children and adults.

Anarchy and Art Allan Antliff 2007-04-01 One of the powers of art is its ability to convey the human aspects of political events. In this fascinating survey on art, artists, and anarchism, Allan Antliff interrogates critical moments when anarchist artists have confronted pivotal events over the past 140 years. The survey begins with Gustave Courbet’s activism during the 1871 Paris Commune (which established the French republic) and ends with anarchist art during the fall of the Soviet empire. Other subjects include the French neoimpressionists, the Dada movement in New York, anarchist art during the Russian Revolution, political art of the 1960s, and gay art and politics post-World War II. Throughout, Antliff vividly explores art’s potential as a vehicle for social change and how it can also shape the course of political events, both historic and present-day; it is a book for the politically engaged and art aficionados alike. Allan Antliff is the author of Anarchist Modernism.

Semi-Monde Noël Coward 2014-05-27 The first single edition of Noël Coward’s most controversial play. "Only in Semi-Monde does Coward find a successful metaphor for the sexual complications that lie behind his posturing. Semi-Monde is easily the most visually daring of his comedies, and the most intellectually startling ... made up of sexually mischievous tableaux vivants and gets much nearer the homosexual knuckle than Coward's public image allowed." - (John Lahr, London Review of Books) Written in 1926 and originally entitled Ritz Bar, Semi-Monde was considered too daring for its time: "its production in London or New York seemed unlikely as some of the characters, owing to lightly suggested abnormalities, would certainly be deleted by the censor" (Noël Coward, Present Indicative). The play finally received its public premiere only after Coward's death, at the Citizen’s Theatre, Glasgow, in September 1977.

Laser-Induced Dynamic Gratings Hans Joachim Eichler 2013-06-29 The invention ofthe laser 25years ago resulted in powerfullight sources which led to the observation of unexpected and striking phenomena. New fields of science such as holography and nonlinear optics developed constituting the basis of this volume. The classical principle of linear superposition of light wavesdoes not hold anymore. Two laser beams crossing in a suitable material may produce a set of new beams with different directions and frequencies. The interaction of light waves can be understood by considering the optical grating structures which develop in the overlap region. The optical properties of matter become spatially modulated in the interference region of two light waves. Permanent holographic gratings have been produced in this way by photographic processes for many years. In contrast, dynamic or transient gratings disappear after the inducing light source, usually a laser, has been switched off. The grating amplitude is controlled by the light intensity. Dynamic gratings have been induced in a large number ofsolids, liquids, and gases, and are detected by diffraction, 'forced light scattering' of a third probing beam, or by self-diffraction of the light waves inducing the grating. The combined interference and diffraction effect corresponds to four-wave mixing (FWM) in the language of nonlinear optics. The process is called degenerate ifthe frequenciesofthe three incident wavesand the scattered wave are equal. Degenerate four-wave mixing (DFWM) is a simple method to achieve phase conjugation, i.e. to generate a wave which propagates time reversed with respect to an incident wave.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Landscape and Sustainable Development Professor Peter Howard 2015-04-28 Previously published in French by Editions Quae, this volume presents findings of a major research programme into landscape and sustainable development. While led by French scholars, the research team and geographical scope of the project was international, collaborative and comparative. Using case studies from across Europe, the interdisciplinary team of contributors discuss the relationship between landscape as defined by the European Landscape Convention and the concept of sustainable development. This English edition has a new introduction written by Yves Luginbühl and Peter Howard. Some of the topics covered, such as wind-farm landscapes, will be familiar to English language readers, but others, are less so, such as footpath economics, non-woodland trees, inter-generational equity, and the insistence on the necessary developments in governance.

Pathology of the Cervix C. Simon Herrington 2017-09-09 This is the third volume in the Essentials of Diagnostic Gynecological Pathology series sponsored by the British Association of Gynecological Pathologists. Focusing on cervical pathology, it provides an update on current diagnostic criteria, the use of biomarkers and specimen handling. It serves as a quick desktop reference facilitating accurate diagnosis, and also provides detailed descriptions and an exhaustive reference list for more in-depth study. Sections devoted to the changing landscape of cervical screening, current management and future directions are included. Standardized terminology, the biology of HPV-related pre-invasive disease, and the staging of early cervical cancers are discussed. As most histopathology departments receive many gynecological specimens, Pathology of the Cervix has been written to be useful diagnostically to general as well as specialist gynecological pathologists and pathologists in training. Gynecologists, oncologists, dermatologists, genitourinary physicians and cancer nurse specialists will find expert insights here that will help in treatment and counselling of their patients.ⓘ

Prospective Memory Matthias Kliegel 2012-09-10 Over the last decade, the topic of prospective memory – the encoding, storage and delayed retrieval of intended actions – has

attracted much interest, and this is reflected in a rapidly growing body of literature: 350 scientific articles have been published on this topic since the appearance of the first edited book in 1996. In addition to the quantity, the quality and diversity of approaches to research in the field has also developed rapidly. Prospective Memory provides an accessible, integrated guide to the expanded literature on the topic. While many of the authors also contributed to the 1996 book and can be regarded as the founders of current prospective memory research, other contributions come from authors who are relatively new to the field and who are examining broader aspects of prospective memory and, as a result, extending our understanding of it. Besides more generally reviewing the expanded literature, all authors have been encouraged to consider future directions for research and to raise questions that they believe all researchers in this area will need to address. The book is divided into four sections that together provide a broad and deep introduction to the cognitive, neuroscience, developmental, and applied aspects of prospective memory. Following the model of the first prospective memory volume, prominent memory researchers evaluate the papers in each section and comment more generally on the state of prospective memory research in the four major areas targeted.

The Secret Agent Joseph Conrad 2014-01-21 The Secret Agent: A Simple Tale is a novel by Joseph Conrad published in 1907. The story is set in London in 1886 and deals largely with the life of Mr. Verloc and his job as a spy. The Secret Agent is also notable as it is one of Conrad's later political novels, which move away from his typical tales of seafaring. The novel deals broadly with the notions of anarchism, espionage, and terrorism. It portrays anarchist or revolutionary groups before many of the social uprisings of the twentieth century. However, it also deals with exploitation, particularly with regard to Verloc's relationship with his brother-in-law Stevie. Because of its terrorist theme, The Secret Agent was noted as "one of the three works of literature most cited in the American media" around two weeks after 11 September 2001. The Secret Agent was ranked the 46th best novel of the 20th century by Modern Library. *Secondary Education in Austria* Helmut Aigner 1995-01-01 The series entitled "Guide to secondary education in Europe" is developed as part of the project "A secondary education in Europe". The Women's Liberation Movement in Russia Richard Stites 2021-07-13 Richard Stites views the struggle for liberation of Russian women in the context of both nineteenth-century European feminism and twentieth-century communism. The central personalities, their vigorous exchange of ideas, the social and political events that marked the emerging ideal of emancipation--all come to life in this absorbing and dramatic account. The author's history begins with the feminist, nihilist, and populist impulses of the 1860s and 1870s, and leads to the social mobilization campaigns of the early Soviet period.

Scientific Astrophotography Gerald R. Hubbell 2012-11-09 Scientific Astrophotography is intended for those amateur astronomers who are looking for new challenges, once they have mastered visual observing and the basic imaging of various astronomical objects. It will also be a useful reference for scientifically inclined observers who want to learn the fundamentals of astrophotography with a firm emphasis on the discipline of scientific imaging. This books is not about making beautiful astronomical images; it is about recording astronomical images that are scientifically rigorous and from which accurate data can be extracted. This book is unique in that it gives readers the skills necessary for obtaining excellent images for scientific purposes in a concise and procedurally oriented manner. This not only gets the reader used to a disciplined approach to imaging to maximize quality, but also to maximize the success (and minimize the frustration!) inherent in the pursuit of astrophotography. The knowledge and skills imparted to the reader of this handbook also provide an excellent basis for “beautiful picture” astrophotography! There is a wealth of information in this book – a distillation of ideas and data presented by a diverse set of sources and based on the most recent techniques, equipment, and data available to the amateur astronomer. There are also numerous practical exercises. Scientific Astrophotography is perfect for any amateur astronomer who wants to go beyond just astrophotography and actually contribute to the science of astronomy.

Landscape and Sustainable Development 2006-01-01 The Council of Europe landscape convention was adopted in Florence (Italy) on 20 October 2000 with the aim of promoting the protection, management and planning of European landscape and organising European co-operation in this area. It is the first international treaty covering all aspects of European landscape. It applies to the entire territory of the contracting parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes that might be considered outstanding, commonplace or deteriorated. By taking into account landscape, culture and nature, the Council of Europe seeks to protect the quality of life and well-being of Europeans in a sustainable development perspective.

Charles I and the People of England David Cressy 2015 The story of the reign of Charles I - through the lives of his people. Prize-winning historian David Cressy mines the widest range of archival and printed sources, including ballads, sermons, speeches, letters, diaries, petitions, proclamations, and the proceedings of secular and ecclesiastical courts, to explore the aspirations and expectations not only of the king and his followers, but also the unruly energies of many of his subjects, showing how royal authority was constituted, in peace and in war - and how it began to fall apart. A blend of micro-historical analysis and constitutional theory, parish politics and ecclesiology, military, cultural, and social history, Charles I and the People of England is the first major attempt to connect the political, constitutional, and religious history of this crucial period in English history with the experience and aspirations of the rest of the population. From the king and his ministers to the everyday dealings and opinions of parishioners, petitioners, and taxpayers, David Cressy re-creates the broadest possible panorama of early Stuart England, as it slipped from complacency to revolution.
