The Soviet Union and Communist China 1945-1950: The Arduous Road to the Alliance Dieter Heinzig
2015-06-18 Drawing on a wealth of new sources, this work documents the evolving relationship between Moscow and Peking in the twentieth century. Using newly available Russian and Chinese archival documents, memoirs written in the 1980s and 1990s, and interviews with high-ranking Soviet and Chinese eyewitnesses, the book provides the basis for a new interpretation of this relationship and a glimpse of previously unknown events that shaped the Sino-Soviet alliance. An appendix contains translated Chinese and Soviet documents - many of which are being published for the first time. The book focuses mainly on Communist China's relationship with Moscow after the conclusion of the treaty between the Soviet Union and Kuomintang China in 1945, up until the signing of the treaty between Moscow and the Chinese Communist Party in 1950. It also looks at China's relationship with Moscow from 1920 to 1945, as well as developments from 1950 to the

present. The author reevaluates existing sources and literature on the topic, and demonstrates that the alliance was reached despite disagreements and distrust on both sides and was not an inevitable conclusion. He also shows that the relationship between the two Communist parties was based on national interest politics, and not on similar ideological convictions.

The Psychology of the Language Learner Revisited
Zoltan Dornyei 2015-04-24 Over the past decade, the focus of inquiry into the psychology of SLA has shifted from the analysis of various characteristics within individuals towards a greater consideration of individuals' dynamic interactions with diverse contexts. This revisit of the bestselling *The Psychology of the Language Learner* reflects on these developments by challenging some of the assumptions upon which the original text was based, maintaining the familiar structure of the original, while situating the discussion within a very different theoretical framework. Written in a lively, accessible style, the book considers how the field has evolved and maintains a keen eye on the future, suggesting exciting new directions for the psychology of SLA. *The Psychology of the Language Learner Revisited* will appeal to students and researchers in a wide range of disciplines, including applied linguistics, second language acquisition, modern languages, and psychology.

Crossing Boundaries, Building Bridges Annie Canel

2005-08-08 Women engineers have been in the public limelight for decades, yet we have surprisingly little historically grounded understanding of the patterns of employment and education of women in this field. Most studies are either policy papers or limited to statistical analyses. Moreover, the scant historical research so far available emphasizes the individual, single and unique character of those women working in engineering, often using anecdotal evidence but ignoring larger issues like the patterns of the labour market and educational institutions. *Crossing Boundaries, Building Bridges* offers answers to the question why women engineers have required special permits to pass through the male guarded gates of engineering and examines how they have managed this. It explores the differences and similarities between women engineers in nine countries from a gender point of view. Through case studies the book considers the mechanisms of exclusion and inclusion of women engineers.

Oxygen and the Diver Kenneth Donald 1992
 Oxygen poisoning is, after decompression sickness, the second most important threat to the diver. This book is the first to be entirely devoted to the subject. The author, an acknowledged authority in the field, covers all situations where oxygen or hyperventilating gas mixtures are employed at increased pressures, and reviews many of the factors which may affect the incidence of poisoning.

Geospatial Thinking Marco Painho 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were

submitted as full-papers to the AGILE annual international conference. Those papers went through a competitive review process. The 13 AGILE conference call for full-papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title “Geospatial Thinking”. The efficient use of geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conceptualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Applications.

Science, Women and Revolution in Russia Koblitz 2014-01-02 While the women's movement might seem like a relatively new concept, Russian women of the 1860s deserve to be acknowledged as individuals who changed the direction of science and opened the doors of higher education to women throughout Europe. The 1860's and 1870's witnessed a rise in women's consciousness and the beginnings of the Russian revolutionary movement that saw women pursue and receive doctorates in many areas of science. These same women went on to become some of the brightest in their fields. This

book provides a look at Russian women scientists of the 1860's, their personal independence, and technical and literary achievements that made science the popular social movement of the time and changed the face of the Russian intellectual culture.

Pulp and Paper Processing Salim Newaz Kazi
2018-10-03 This book gives emphasis to wood fiber raw materials, alternative sources of fibers for paper production, environmental issues, paper quality improvement and cost of paper production. Varieties of non-wood raw materials, including kenaf, rice straw, empty fruit bunches of palm trees, bamboo, bagasse, etc., are considered in this book. The process of fiber treatment also varied to meet paper quality improvement. Different organosolv processes of fiber treatment are discussed. Considering contemporary issues, one particular chapter analyzes the environmentally friendly way of processing non-wood fibers for paper production. The book also contains a chapter on the by-product raw materials of paper production and their profitable applications.

Conceptions of Assessment Gavin T. L. Brown
2008-01-01 The purpose of this book is to open a new approach to the design and implementation of classroom assessment and large scale assessment by examining how the participants (ie: teachers and students) actually understand what they are doing in assessment and make recommendations as to how improvements can be made to training, policy, and assessment innovations in the light of those insights. By marrying large-scale surveys, in-depth qualitative analyses, and sophisticated measurement techniques, new insights into teacher and student experience and use of assessment can be determined. These new insights will permit the design and delivery of more effective assessments. Further, it provides us an opportunity to examine whether conceiving of assessment in a certain way (eg: assessment improves quality or assessment is bad or deep learning cannot be assessed) actually

contributes to higher or better educational outcomes.

Emotions and English Language Teaching Sarah Benesch 2017-02-17 Taking a critical approach that considers the role of power, and resistance to power, in teachers' affective lives, Sarah Benesch examines the relationship between English language teaching and emotions in postsecondary classrooms. The exploration takes into account implicit feeling rules that may drive institutional expectations of teacher performance and affect teachers' responses to and decisions about pedagogical matters. Based on interviews with postsecondary English language teachers, the book analyzes ways in which they negotiate tension—theorized as emotion labor—between feeling rules and teachers' professional training and/or experience, in particularly challenging areas of teaching: high-stakes literacy testing; responding to student writing; plagiarism; and attendance. Discussion of this rich interview data offers an expanded and nuanced understanding of English language teaching, one positing teachers' emotion labor as a framework for theorizing emotions critically and as

a tool of teacher agency and resistance.

The Electrification of Russia, 1880–1926 Jonathan Coopersmith 2016-11-01 The *Electrification of Russia, 1880–1926* is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia.

Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

Becoming Muslim in Imperial Russia Agnès Nilüfer Kefeli 2014-12-18 In the nineteenth century, the Russian Empire's Middle Volga region (today's Tatarstan) was the site of a prolonged struggle between Russian Orthodoxy and Islam, each of which sought to solidify its influence among the frontier's mix of Turkic, Finno-Ugric, and Slavic peoples. The immediate catalyst of the events that Agnès Nilüfer Kefeli chronicles in *Becoming Muslim in Imperial Russia* was the collective turn to Islam by many of the region's Kräshens, the Muslim and animist Tatars who converted to Russian Orthodoxy between the sixteenth and eighteenth centuries. The traditional view holds that the apostates had really been Muslim all along or that their conversions had been forced by the state or undertaken voluntarily as a matter of convenience. In Kefeli's view, this argument vastly oversimplifies the complexity of a region where many participated in the religious cultures of both Islam and Orthodox Christianity and where a vibrant Kräshen community has survived to the present. By analyzing Russian, Eurasian, and Central Asian ethnographic, administrative, literary, and missionary sources, Kefeli shows how traditional education, with Sufi mystical components, helped to Islamize Finno-Ugric and Turkic peoples in the Kama-Volga countryside and set the stage for the development of modernist Islam in Russia. Of particular interest is Kefeli's

emphasis on the role that Tatar women (both Kräshen and Muslim) played as holders and transmitters of Sufi knowledge. Today, she notes, intellectuals and mullahs in Tatarstan seek to revive both Sufi and modernist traditions to counteract new expressions of Islam and promote a purely Tatar Islam aware of its specificity in a post-Christian and secular environment.

Underground Maps After Beck Maxwell J. Roberts 2005 This book picks up where Ken Garland completed his work (*Mr Beck's Underground Map, Capital Transport* 1994) to take the story of the map from when Harry Beck's services were dispensed with, to the present day. Based upon extensive research of London Transport archives and at London's Transport Museum, this book surveys the major changes that have taken place over the years, and the reasoning and political background that led to them.

An Apology for Mohammed and the Koran John Davenport 1869

Revolutionary Acts Lynn Mally 2016-11-01 During the Russian Revolution and Civil War, amateur theater groups sprang up in cities across the country. Workers, peasants, students, soldiers, and sailors provided entertainment ranging from improvisations to gymnastics and from propaganda

sketches to the plays of Chekhov. In *Revolutionary Acts*, Lynn Mally reconstructs the history of the amateur stage in Soviet Russia from 1917 to the height of the Stalinist purges. Her book illustrates in fascinating detail how Soviet culture was transformed during the new regime's first two decades in power. Of all the arts, theater had a special appeal for mass audiences in Russia, and with the coming of the revolution it took on an important role in the dissemination of the new socialist culture. Mally's analysis of amateur theater as a space where performers, their audiences, and the political authorities came into contact enables her to explore whether this culture emerged spontaneously "from below" or was imposed by the revolutionary elite. She shows that by the late 1920s, Soviet leaders had come to distrust the initiatives of the lower classes, and the amateur theaters fell increasingly under the guidance of artistic professionals. Within a few years, state agencies intervened to homogenize repertoire and performance style, and with the institutionalization of Socialist Realist principles, only those works in a unified Soviet canon were presented.

Life Histories of Etnos Theory in Russia and Beyond David G. Anderson 2019-02-25 The idea of etnos came into being over a hundred years ago as a way of understanding the collective identities of people with a common language and shared traditions. In the twentieth century, the concept came to be associated with Soviet state-building, and it fell sharply out of favour. Yet outside the academy, etnos-style arguments not only persist, but are a vibrant part of regional anthropological traditions. *Life Histories of Etnos Theory in Russia and Beyond* makes a powerful argument for reconsidering the importance of etnos in our understanding of ethnicity and national identity across Eurasia. The collection brings to life a rich archive of previously unpublished letters, fieldnotes, and photographic collections of the

theory's early proponents. Using contemporary fieldwork and case studies, the volume shows how the ideas of these ethnographers continue to impact and shape identities in various regional theatres from Ukraine to the Russian North to the Manchurian steppes of what is now China. Through writing a life history of these collectivist concepts, the contributors to this volume unveil a world where the assumptions of liberal individualism do not hold. In doing so, they demonstrate how notions of belonging are not fleeting but persistent, multi-generational, and bio-social. This collection is essential reading for anyone interested in Russian and Chinese area studies. It will also appeal to historians and students of anthropology and ethnography more generally.
