Non-Invasive Data Governance Robert S. Seiner 2014-09-01 Data-governance programs focus on authority and accountability for the management of data as a valued organizational asset. Data Governance should not be about command-and-control, yet at times could become invasive or threatening to the work, people and culture of an organization. Non-Invasive Data Governance™ focuses on formalizing existing accountability for the management of data and improving formal communications, protection, and quality efforts through effective stewarding of data resources. Non-Invasive Data Governance will provide you with a complete set of tools to help you deliver a successful data governance program. Learn how: • Steward responsibilities can be identified and recognized, formalized, and engaged according to their existing responsibility rather than being assigned or handed to people as more work. • Governance of information can be applied to existing policies, standard operating procedures, practices, and methodologies, rather than being introduced or emphasized as new processes or methods. • Governance of information can support all data integration, risk management, business intelligence and master data management activities rather than imposing inconsistent rigor to these initiatives. • A practical and non-threatening approach can be applied to governing information and promoting stewardship of data as a cross-organization asset. • Best practices and key concepts of this non-threatening approach can be communicated effectively to Leverage strengths and address opportunities to improve.

Managing the Global Firm (RLE International Business) Christopher A Bartlett 2013-01-17 This volume assesses the situation for multinationals at the beginning of the 1990s, bringing together contributions from academics recognized as world leaders in the field and from practitioners with wide experience in international management. Drawing on perspectives from Europe, the USA and Japan, the contributors outline the shape of the global firm of the future. Nor the Moon by Night Joey Krueger 2021-03-08 Lucas Behr lives a life of adventure, traveling to exotic locations for his photojournalism work and to satisfy his own restlessness. Unanchored by familial connections or friendships, it has allowed him tremendous freedom, but it has also left him adrift and searching for something more.When a chance meeting with a young journalist, Maggie, develops into something more, it seems he has found what he was seeking–someone with whom to share in the journey. Still, he is restless. Unable to shake the memories of the bridges he has burned, he sets about rebuilding them in his own imperfect way. Some hurts prove deep and difficult to mend, though, while he must be cautious to avoid causing further hurt along the way.Reconciliation and forgiveness can be hard to give but, sometimes, even harder to ask for. Lucas must first learn to get out of his own way in order to give more fully of himself to others.

Motivation for Achievement M. Kay Alderman 2013-05-13 Understanding student and teacher motivation and developing strategies to foster motivation for students at all levels of performance are essential to effective teaching. This text is designed to help prospective and practicing teachers achieve these goals. Its premise is that current research and theory about motivation offer hope and possibilities for educators –teachers, parents, coaches, and administrators—to enhance motivation for achievement. The orientation draws primarily on social-cognitive perspectives that have generated much research relevant to classroom practice. Ideal for any course that is dedicated to, or includes coverage of, motivation and achievement, the text focuses on two key roles teachers play in supporting and cultivating motivation in the classroom: establishing the classroom structure and instruction that provides the environment for optimal motivation, engagement, and learning; and helping students develop the tools that will enable them to be self-regulated learners and develop their potential. Pedagogical features aid the understanding of concepts and the application to practice: Strategy boxes present guidelines and strategies for using the various concepts. Exhibit boxes include forms for different purposes (for example, goal setting), examples of teacher beliefs and practices, and samples of student work. Reflection boxes stimulate readers' thinking about motivational issues inherent in the topics, their experiences, and their beliefs. A motivational toolbox at the end of each chapter helps readers identify important points to think about, lingering questions, strategies to use now, and strategies to develop in the future. NEW IN THE THIRD EDITIION Updated research and new topics are added throughout as warranted by current inquiry in the field. Chapters are reorganized to provide more coherence and to account for new findings. New and updated material is included on issues of educational reform, standards for achievement, and high-stakes testing, and on achievement goal theory, especially regarding performance goals and the distinction between performance-approach and performance-avoidance goals as relevant to classroom practice.

Migration and Social Protection in Europe and Beyond (Volume 3) Jean-Michel Lafleur 2020-12-14 This third and last open access volume in the series takes the perspective of non-EU countries on immigrant social protection. By focusing on 12 of the largest sending countries to the EU, the book tackles the issue of the multiple areas of sending state intervention towards migrant populations. Two “mirroring” chapters are dedicated to each of the 12 non-EU states analysed (Argentina, China, Ecuador, India, Lebanon, Morocco, Russia, Senegal, Serbia, Switzerland, Tunisia, Turkey). One chapter focuses on access to social benefits across five core policy areas (health care, unemployment, old-age pensions, family benefits, guaranteed minimum resources) by discussing the social protection policies that non-EU countries offer to national residents, non-national residents, and non-resident nationals. The second chapter examines the role of key actors (consulates, diaspora institutions and home country ministries and agencies) through which non-EU sending countries respond to the needs of nationals abroad. The volume additionally includes two chapters focusing on the peculiar case of the United Kingdom after the Brexit referendum. Overall, this volume contributes to ongoing debates on migration and the welfare state in Europe by showing how non-EU sending states continue to play a role in third country nationals’ ability to deal with social risks. As such this book is a valuable read to researchers, policy makers, government employees and NGO’s.

Introduction to Medical Geology C. B. Dissanayake 2009-09-01 Over two billion people live in tropical lands. Most of them live in intimate contact with the immediate geological environment, obtaining their food and water directly from it. The unique geochemistry of these tropical environments have a marked influence on their health, giving rise to diseases that affect millions of people. The origin of these diseases is geologic as exemplified by dental and skeletal fluorosis, iodine deficiency disorders, trace element imbalances to name a few. This book, one of the first of its kind, serves as an excellent introduction to the emerging discipline of Medical Geology.

Federalism and Local Politics in Russia Cameron Ross 2008-10-27 This book examines federalism and regional and local politics in Russia. Many commentators have alluded to the unique nature of Russia's dual transition and its difficult task of simultaneously reforming its economy and polity. But there is in fact a third transition under way in Russia that is of no less importance, the need to reconfigure central-local relations and to create a stable and viable form of federalism. Federal states are much more difficult to set up than unitary ones, and forging a new federal system at the same time as privatising the economy and trying to radically overhaul the political system has clearly made Russia's transition triply difficult. The book discusses how Vladimir Putin has re-asserted the power of the centre in Russia, and tightened the federal government's control of the regions. It shows how, contrary to his rhetoric about developing Russia as a free and democratic state, authoritarianism has been extended - through his reorganisation of the Federation Council, his usurpation of powers to dismiss regional assemblies and chief executives, and his creation of seven unelected super-governors. The book explores a wide range of issues related to these developments, including a comparative study of Russian federalism and local politics, ethnic federalism, the merging of federal units, regional governors, electoral and party reforms, and regional and local politics. It also includes case studies of local and regional politics in specific regions.

Migration and Social Protection in Europe and Beyond (Volume 2) Jean-Michel Lafleur 2020-10-30 This second open access book in a series of three volumes examines the repertoire of policies and programmes led by EU Member States to engage with their nationals residing abroad. Focusing on sending states’ engagement in the area of social protection, this book shows how a series of emigration-related policies that go beyond the realm of social security address the needs of nationals abroad in the area of health care, unemployment, family benefits, pensions and economic hardship. In addition, this volume highlights the variety of sending states’ institutions that are involved in these policies (consulates, diaspora institutions, ministries, agencies...) and their engagement with citizens abroad in other policy areas such as electoral rights, citizenship, language, culture, education, business or religion. As such this book is a valuable read to researchers, policy makers, government employees and NGO’s.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years--it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Depression and Diabetes Wayne Katon 2011-06-09 In recent years, there has been a growing awareness of the multiple interrelationships between depression and various physical diseases. The WPA is providing an update of currently available evidence on these interrelationships by the publication of three books, dealing with the comorbidity of depression with diabetes, heart disease and cancer. Depression is a frequent and serious comorbid condition in diabetes, which adversely affects quality of life and the long-term prognosis. Co-occurrent depression presents peculiar clinical challenges, making both conditions harder to manage. Depression and Diabetes is the first book devoted to the interaction between these common disorders. World leaders in diabetes, depression and public health synthesize current evidence, including some previously unpublished data, in a concise, easy-to-read format. They provide an overview of the epidemiology, pathogenesis, medical costs, management, and public health and cultural implications of the comorbidity between depression and diabetes. The book describes how the negative consequences of depression in diabetes could be avoided, given that effective depression treatments for diabetic patients are available. Its practical approach makes the book ideal for all those involved in the management of these patients: psychiatrists, psychologists, diabetologists, general practitioners, diabetes specialist nurses and mental health nurses.

The AMDP System Broome, Matthew R. 2017-10-31 The 9th edition of this valuable tool for assessing and documenting psychopathology, now in English! Now in its 9th edition, the AMDP System is a widely used tool for documenting psychiatric symptoms in clinical and research projects. It is not only an essential part of many internal clinical documentation systems, but it is also a valuable instrument for training the identification of psychopathological symptoms. This new edition, now in English, involved the complete revision of the psychopathological and somatic symptoms, with particular attention to the elimination of ambiguities and inconsistencies, to the precision of definitions, to the exact differentiation of the self and other ratings, as well as to the user friendliness of the system. Taking account of developments in recent years in the description and rating of psychopathological symptoms, this latest edition of the AMDP System has been extended by an additional eleven psychopathological and three somatic symptoms and a new section on syndrome formation in the appendix. This clearly structured manual enables the standardized application of the system, making it an invaluable tool in the training of medicine and psychology students and an essential reference volume in the psychiatric field. The AMD System is also available as test consisting of manual and documentation forms.

Taming Uncertainty Ralph Hertwig 2019-08-13 An examination of the cognitive tools that the mind uses to grapple with uncertainty in the real world. How do humans navigate uncertainty, continuously making near-effortless decisions and predictions even under conditions of imperfect knowledge, high complexity, and extreme time pressure? Taming Uncertainty argues that the human mind has developed tools to grapple with uncertainty. Unlike much previous scholarship in psychology and economics, this approach is rooted in what is known about what real minds can do. Rather than reducing the human response to uncertainty to an act of juggling probabilities, the authors propose that the human cognitive system has specific tools for dealing with different forms of uncertainty. They identify three types of tools: simple heuristics, tools for information search, and tools for harnessing the wisdom of others. This set of strategies for making predictions, inferences, and decisions constitute the mind's adaptive toolbox. The authors show how these three dimensions of human decision making are integrated and they argue that the toolbox, its cognitive foundation, and the environment are in constant flux and subject to developmental change. They demonstrate that each cognitive tool can be analyzed through the concept of ecological rationality—that is, the fit between specific tools and specific environments. Chapters deal with such specific instances of decision making as food choice architecture, intertemporal choice, financial uncertainty, pedestrian navigation, and adolescent behavior.

The Darkest Eyes Mick Brady 2020-03-17 The Darkest Eyes is an epic portal-crossing adventure with mythic resonance and strong psychological underpinnings. Will Roan is at the top of her game career-wise. She's a deep-sea submersible pilot who's brainy, daring and cool. Her personal life couldn't be more different. For as long as she can remember, she's seen little gray aliens lurking in the shadows, watching her, stalking her. Although she's a scientist who tends to be inquisitive about everything, she has steadfastly refused to examine the disturbing things she's experienced throughout her life, fearing all she'd find would be evidence of her own mental instability. Her effort to present a sane exterior to the world has meant that she could never get too close to anyone or settle down anywhere. Physically and emotionally, she's always been on the run. Lately, though, the grays have been threatening to tear down the wall Will has erected between her inner life and the real world. They've been relentless in their pursuit, infringing on the semblance of normalcy she's constructed. When a particularly frightening encounter costs Will her job, she makes her way home. She's just in time for her dying mother -- her dying, crazy mother -- to give her an object that could explain away Will's madness or draw her inextricably into its clutches. A beautifully carved crystal skull holds the answers to the mystery of Will's life, her mother says. She can use it to cross a portal to Atlantis -- her real home. Will's first instinct is to run, but her flight is interrupted when her beloved young niece disappears, the apparent victim of the aliens. Will decides to plunge into the unknown to find young Becky. Atlantis is beautiful and unspoiled, and its people appear to be living their best lives. However, political intrigue and dissent simmer beneath the surface. Hesosia is a dying world, chaotic and reeking, populated by a race of gray aliens on the verge of extinction. Will must navigate the perils of both worlds to save the child -- and, it turns out, much more. Will is beset with self-doubt. Is she sane? Is anything she's experiencing real? Can she trust anyone? Is it possible that the fate of three worlds could depend on her?

Protection of Materials and Structures from Space Environment J. Kleiman 2006-04-11 This publication presents the proceedings of ICPMSE-6, the sixth international conference on Protection of Materials and Structures from Space Environment, held in Toronto May 1-3, 2002. The ICPMSE series of meetings became an important part of the LEO space community since it was started in 1991. Since then, the meeting has grown steadily, attracting a large number of engineers, researchers, managers, and scientists from industrial companies, scientific institutions and government agencies in Canada, U. S. A. , Asia, and Europe, thus becoming a true international event. This year's meeting is gaining even stronger importance with the resumption of the ISS and other space projects in LEO, GEO and Deep Space. To reflect on these activities, the topics in the program have been extended to include protection of materials in GEO and Deep Space. The combination of a broad selection of technical and scientific topics addressed by internationally known speakers with the charm of Toronto and the hospitality of the organizers brings participants back year after year. The conference was hosted and organized by Integrity Testing Laboratory Inc. (ITL), and held at the University of Toronto's Institute for Aerospace Studies (UTIAS). The meeting was sponsored by the Materials and Manufacturing Ontario (MMO) and the CRESTech, two Ontario Centres of Excellence; Air Force Office of Scientific Research (AFOSR/NL); MD Robotics; EMS Technologies; The Integrity Testing Laboratory (ITL); and the UTIAS.

There's Something about Daniel Robyn Stecher 2010-04-01 There's Something About Daniel is a candid peek into the world of a special child through his mother's open heart. We root for Daniel every step of his ambling gait, and keep our fingers crossed that he will be victorious on the playground, at school, and as he comes of age. However, the stories shared by author Robyn Stecher about Daniel resonate with more than a mother's love, laughter, and hope for her son. These stories share universal truths with us and demonstrate how we can live fully while confronting and embracing the unexpected. Daniel's challenges may be different than most of ours, but as we learn about his life through the eyes of his mother, we are reminded how we must never to give up-or, as Daniel phrases it, "Never give up, even when girls don't like you."

Japanese Missions to the International Space Station John O'Sullivan 2019-03-23 Japan has a rich history of human spaceflight, flying in space with both NASA and the Soviet/Russian space agencies over the years. This book tells the story of the JAXA astronauts who have visited the International Space Station and how they have lived on

board, helped construct the space laboratory and performed valuable scientific experiments. JAXA has contributed the largest single module to the ISS: the Kibō (Hope) science laboratory with its Logistics Module, Exposed Facility and robot arm. JAXA supplies the station with cargo and supplies on its automated cargo spacecraft, the H-II Transfer Vehicle (HTV), but it is the human endeavour that captures the imagination. From brief visits to six-month expeditions, from spacewalking to commanding the Earth's only outpost in space, JAXA astronauts have played a vital role in the international project. Extensive use of colour photographs from NASA and JAXA depicting the experiments carried out and the phases of the ISS construction, together with the personal stories of the astronauts' experiences in space, highlight the crucial part the Japanese have played in human spaceflight.
