The Russian General Staff and Asia, 1860-1917 Alex Marshall 2006-11-22 This new book examines the role of the Tsarist General Staff in studying and administering Russia's Asian borderlands. It considers the nature of the Imperial Russian state, the institutional characteristics of the General Staff, and Russia's relationship with Asia. During the nineteenth century, Russia was an important player in the so-called 'Great Game' in central Asia. Between 1800 and 1917 officers of the Russian General Staff travelled extensively through Turkey, central Asia and the Far East, gathering intelligence that assisted in the formation of future war plans. It goes on to consider tactics of imperial expansion, and the role of military intelligence and war planning with respect to important regions including the Caucasus, central Asia and the Far East. In the light of detailed archival research, it investigates objectively questions such as the possibility of Russia seizing the Bosphorus Straits, and the probability of an expedition to India. Overall, this book provides a comprehensive account of the Russian General Staff, its role in Asia, and of Russian military planning with respect to a region that remains highly strategically significant today.

Haus Tugendhat. Ludwig Mies van der Rohe Daniela Hammer-Tugendhat 2020-07-20 Built and designed by Ludwig Mies van der Rohe 1928-1930, the Tugendhat House in Brno / Czech Republic is one of the most significant buildings of European modernism. In 2001, UNESCO added the house to the List of World Cultural Heritage Sites. In this third, updated edition, the authors give personal and historic insights relating to the house; also documenting aspects pertaining to art history and conservation-science studies. The comprehensive description and in-depth discussion of the materials used is a special feature in this field of research. The appeal of this monograph lies in the publication of photographs from the family archive which, for the first time, show the house in its lived-in condition. The experimental artistic color photographs by Fritz Tugendhat are among the pioneering achievements of amateur photography.

Gender, Class, and the Professionalization of Russian City Teachers, 1860-1914 Christine Ruane 1994-11-15 Christine Ruane examines the issues of gender and class in the teaching profession of late imperial Russia, at a time when the vocation was becoming increasingly feminized in a zealously patriarchal society. Teaching was the first profession open to women in the 1870s, and by the end of the century almost half of all Russian teachers were female. Yet the notion that mothers had a natural affinity for teaching was paradoxically matched by formal and informal bans against married women in the classroom. Ruane reveals not only the patriarchal rationale but also how women teachers viewed their public roles and worked to reverse the marriage ban. Ruane's research and insightful analysis broadens our knowledge of an emerging professional class, especially newly educated and emancipated women, during Russia's transition to a more modern society.
