Peaks and Valleys Spencer Johnson
2010-04-03 From the #1 New York Times bestselling author of *Who Moved My Cheese?*, a brilliant new parable that shows readers how to stay calm and successful, even in the most challenging of environments. A young man lives unhappily in a valley. One day he meets an old man who lives on a mountain peak. At first the young man doesn't realize that he is talking to one of the most peaceful and successful people in the world. But in the course of further encounters and conversations, the young man comes to understand that he can apply the old man's remarkable principles and practical tools to his own life to change it for the better. Spencer Johnson knows how to tell a

deceptively simple story that teaches deep lessons. The *One Minute Manager* (co-written with Ken Blanchard) sold 15 million copies and stayed on the New York Times bestseller list for more than twenty years. Since it was published a decade ago, *Who Moved My Cheese?* has sold more than 25 million copies. In fact there are more than 46 million copies of Spencer Johnson's books in print, in forty-seven languages—and with today's economic uncertainty, his new book could not be more relevant. Pithy, wise, and empowering, *Peaks and Valleys* is clearly destined to become another Spencer Johnson classic.

ABC of Burns Shehan Hettiaratchy 2005-01-24 Burns are one of the most devastating conditions encountered in medicine. The injuries affect people of all ages, both physically and psychologically, in the developed and the developing world. The correct management of burns needs a skilled multidisciplinary approach and this ABC provides an overview of the most important aspects of burn injuries for healthcare professionals. This

ABC book offers a comprehensive yet accessible review of burn management. It introduces the range of burns that a GP may become involved in treating or having treated at hospital. From explanations of how burns happen, through to first aid applications, pre-hospital treatment, dressings, resuscitation and the management of deep dermal burns. It also looks at the subsequent management of burns through hyperalimentation and microbiological management, reconstruction and rehabilitation. A significant contribution to an important area of care: burns are the second most common cause of accidental death in children in the UK. Early treatment of burns is essential to avoid disablement: impact on lungs, infection and later need for plastic surgery can all be reduced by appropriate assessment and prompt treatment. Includes contributions from the UK, USA and Australia, and has a chapter on

international disasters. Presented in a clear and concise manner with many illustrations, this book will appeal to a wide readership including medical students, nurses, hospital doctors, and general practitioners. *Motivational Strategies in the Language Classroom* Zoltan Dörnyei 2001-09-27 When trying to explain any success or failure in second language (L2) learning, the term 'motivation' is often used by teachers and students alike. Indeed, motivation is one of the key learner factors that determines the rate and success of L2 attainment: it provides the primary impetus to initiate learning the L2 and later the driving force to sustain the long learning process. Without sufficient motivation, even individuals with the most remarkable abilities cannot accomplish long-term goals. This book takes a practical approach to teaching motivational strategies in the language classroom, and gives the teacher strategies that

they can use to motivate language learners.

Science vs. Religion Steve Fuller
2013-04-24 For centuries, science and religion have been portrayed as diametrically opposed. In this provocative new book, Steve Fuller examines the apparent clash between science and religion by focusing on the heated debates about evolution and intelligent design theory. In so doing, he claims that science vs. religion is in fact a false dichotomy. For Fuller, supposedly intellectual disputes, such as those between creationist and evolutionist accounts of life, often disguise other institutionally driven conflicts, such as the struggle between State and Church to be the source of legitimate authority in

society. Nowadays many conservative anti-science groups support intelligent design theory, but Fuller argues that the theory's theological roots are much more radical, based on the idea that humans were created to fathom the divine plan, perhaps even complete it. He goes on to examine the unique political circumstances in the United States that make the emergence of intelligent design theory so controversial, yet so persistent. Finally, he considers the long-term prognosis, arguing that the future remains very much undecided as society reopens the question of what it means to be human. This book will appeal to all readers intrigued by the debates about creationism, intelligent design and evolution, especially those looking for an intellectually exciting confrontation with the politics and promise of intelligent design theory.

Motivation in Education Dale H. Schunk 2013-01-03 The academic standard for texts on motivation in educational settings. Clear and engaging, *Motivation in Education: Theory, Research, and Applications*, Fourth Edition presents the major motivation theories, principles, and research findings in sufficient detail to help students understand the complexity of motivational processes, and provide it provides extensive examples of the application of motivational concepts and principles in educational settings. From reviews of *Motivation in*

Education: "I find it essential that students have access to such strong representations of the basic theories and work in the field of motivation. . . . This book goes a long way toward reinforcing the voices of experts who make data-driven decisions about how to foster motivation. . . . There are no available books [on motivation] as excellently crafted as this one." -- Theresa A. Thorkildsen, University of Illinois at Chicago "This book is certainly the most comprehensive treatment of motivation. There are several others I have perused but they often take a certain approach to motivation whereas this book covers ALL approaches. The authors present a very complete and unbiased treatment of the literature." --Daniel H. Robinson, University of Texas
