*A History of the Balkans 1804-1945* Stevan K. Pavlowitch  
2014-09-25 The Balkans have often been a flashpoint of conflict in European history. The recent civil war has torn the country apart and the region faces an uncertain future. This authoritative study provides an account of the history of the whole area from the first major nationalist rising against its Ottoman rulers in 1804 to the aftermath of World War II. Covering the former Yugoslavia, Albania, Greece, Bulgaria and Romania , it provides a Balkan-wide overview as well as histories of specific states and sets the context to the recent conflict.

*This Time Together* Carol Burnett 2010-04-06 This touching and hilarious memoir is 100 percent Carol Burnett—funny, irreverent, and irresistible. Carol Burnett is one of the most beloved and revered actresses and performers in America. The Carol Burnett Show was seen each week by millions of adoring fans and won

twenty-five Emmys in its remarkable eleven-year run. Now, in *This Time Together*, Carol really lets her hair down and tells one funny or touching or memorable story after another. In engaging anecdotes, Carol discusses her remarkable friendships with stars such as Jimmy Stewart, Lucille Ball, Cary Grant, and Julie Andrews; the background behind famous scenes, like the moment she swept down the stairs in her curtain-rod dress in the legendary “Went with the Wind” skit; and things that would happen only to Carol—the prank with Julie Andrews that went wrong in front of the First Lady; the famous Tarzan Yell that saved her during a mugging; and the time she faked a wooden leg to get served in a famous ice cream emporium. This poignant look back allows us to cry with the actress during her sorrows, rejoice in her successes, and finally, always, to laugh.

*A Catalogue of the Minerals of Tasmania* Ralph Stephen Bottrill 2008 Catalogues of the minerals found in Tasmania have been kept since almost the earliest days of mining and have been of invaluable assistance to

prospectors, mineral explorers, mineralogists and collectors. This catalogue was first published by the Tasmania Department of Mines in 1910, and was extensively revised in 1969. Since then the improvements in technology and further investigations of minerals and mineral deposits have not only increased the number of identified species and data on mineral occurrences, but have also invalidated many previous 'species'. This catalogue extensively updates the previous catalogue. A total of 753 minerals are described, comprising 483 confirmed species, 162 unconfirmed species, 72 variety or invalid names, and 36 series and group names. All entries in the 1969 catalogue have been re-evaluated and are now reclassified as to their known or likely validity. Species invalidated or doubted from the 1969 listing have been retained, with comments.

**The European Monetary Union** Helmut Siekmann 2021-12-23  
This book provides a commentary on the law of the EU related to the Monetary Union. It contains a comprehensive analysis of all provisions of the Statute of the European System of Central Banks (ESCB) and the European Central Bank (ECB). In addition, the book also analyses all provisions of the Treaties themselves which regulate the ESCB and the ECB. This analysis is supplemented by commentaries on other Protocols which contain relevant rules for the Monetary Union. In essence, all relevant statutory rules governing the euro and its key monetary authority, the European Central Bank, are unfolded and explained in one volume. This gives the book a unique position in the legal literature on the law of the EU. With contributions by renowned academics and practitioners, this book is an expanded and updated translation of the 2013 German commentary, EWU Kommentar zu Europäischen Währungsunion (Mohr

Siebeck) and is an invaluable resource for practitioners and academics alike who are looking for a provision-by-provision commentary on the laws governing the European Monetary Union.

**Song Translation: Lyrics in Contexts** Johan Franzon 2021-02-01  
Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

**The Grotowski Sourcebook** RICHARD SCHECHNER 2013-11-05 This acclaimed volume is the first to provide a comprehensive overview of Jerzy Grotowski's long and multi-faceted career. It is essential reading for anyone interested in Grotowski's life and work. Edited by the two leading experts on Grotowski, the sourcebook features: \*essays from the key performance theorists who worked with Grotowski, including Eugenio Barba, Peter Brook, Jan Kott, Eric Bentley, Harold Clurman, and Charles Marowitz \*writings which trace every phase of Grotowski's career from his 'theatre of production' to 'objective drama' and 'art as vehicle' \*a wide-ranging collection of Grotowski's own writings, plus an interview with his closest collaborator and 'heir', Thomas Richards \*an array of photographs documenting Grotowski and his followers in action \*a historical-critical study of Grotowski by Richard Schechner.

**Planetary Materials** James J. Papike 2018-12-17 Volume 36 of Reviews in Mineralogy presents a comprehensive

coverage of the mineralogy and petrology of planetary materials. The book is organized with an introductory chapter that introduces the reader to the nature of the planetary sample suite and provides some insights into the diverse environments from which they come. Chapter 2 on Interplanetary Dust Particles (IDPs) and Chapter 3 on Chondritic Meteorites deal with the most primitive and unevolved materials we have to work with. It is these materials that hold the clues to the nature of the solar nebula and the processes that led to the initial stages of planetary formation. Chapter 4, 5, and 6 consider samples from evolved asteroids, the Moon and Mars respectively. Chapter 7 is a brief summary chapter that compares aspects of melt-derived minerals from differing planetary environments.

**Intraplate Volcanism** Robert Wallace Johnson 1989-11-24 This study of the young volcanoes of eastern Australia and parts of New Zealand looks at rock types and formation and inclusions of the upper mantle and lower-crustal rocks found in volcanic deposits. It discusses the Earth's crust and the mantle beneath, and the geological evolution in the area over the last 70-80 million years.

The Law of Targeting William H. Boothby 2012-08-16 Targeting is the primary method for securing strategic objectives in an armed conflict. Failure to comply with the law of targeting jeopardizes the achievement of those aims. It is therefore essential that all those involved in or studying issues surrounding targeting have an accurate and complete understanding of this area of law. This book offers the definitive and comprehensive statement of all aspects of the law of

targeting. It is a 'one-stop shop' that answers all relevant questions in depth. It has been written in an open, accessible yet comprehensive style, and addresses both matters of established law and issues of topical controversy. The text explains the meanings of such terms as 'civilian', 'combatant', and 'military objective'. Chapters are devoted to the core targeting principles of distinction, discrimination, and proportionality, as well as to the relationship between targeting and the protection of the environment and of objects and persons entitled to special protection. New technologies are also covered, with chapters looking at attacks using unmanned platforms and a discussion of the issues arising from cyber warfare. The book also examines recent controversies and perceived ambiguities in the rules governing targeting, including the use of human shields, the level of care required in a bombing campaign, and the difficulties involved in determining whether someone is directly participating in hostilities. This book will be invaluable to all working in this contentious area of law.

**Philosophical Issues in Tourism** Prof. John Tribe  
2009-03-19 Despite the geometric expansion of tourism knowledge, some areas have remained stubbornly underdeveloped and a full or comprehensive consideration of the philosophical issues of tourism represents one such significant knowledge gap. A key aim of this book therefore is to provide an initial mapping of, and fresh insights into this territory. In doing so it discusses key philosophical questions in the field such as What is tourism? Who is a tourist? What is wisdom? What is it to know something? What is the nature of reality? Why are some destinations considered beautiful? Why is tourism desirable? What is good and bad tourism? What are

desirable ends? These and similar topics are addressed in this book under the headings of truth, beauty and virtue.

Al Jazeera Hugh Miles 2010-03-04 With more than fifty million viewers, Al Jazeera is one of the most widely watched news channels in the world. It's also one of the most controversial. Set up by the eccentric Emir of Qatar, who turned a failed BBC Arabic television project into an Arab news channel, Al Jazeera quickly became a household name after September 11th by delivering some of the biggest scoops in television history, including airing a taped speech from Osama bin Laden. Lambasted as a mouthpiece for Al Qaeda, little is actually known about Al Jazeera and its operations. Financed by one of the wealthiest countries in the world, Al Jazeera quickly established itself as the premiere news channel in the Islamic world by covering events Arabs cared about in a way they had never seen before. However, accusations of ties to Al Qaeda continue to plague it. Their journalists have been accused of spying for everyone from Mossad to Saddam Hussein, sometimes simultaneously. This is the story behind the Arab news channel that makes the news.

Stress and Immunity Nicholas P. Plotnikoff 1991-10-23  
Stress and Immunity introduces and updates the status of research on stress and immunity. Clinical aspects of

stress and immunity are presented in the first 17 chapters and include discussions regarding the influence of depression disorders on immune functions and stress interrelationships with cancer, AIDS, Chronic Fatigue Syndrome, and Herpes Simplex infections. There is also a review of physical exercise and immunity. The second half of the book is devoted to discussions regarding basic research being conducted in the field of stress and immunity. This includes discussions on the interrelationships of the central nervous system and the immune system and research on stress hormones (e.g., enkephalins, endorphins) as they interrelate with the immune system. In addition, animal models for the study of stress and immunity are discussed. Psychiatrists, neurologists, psychologists, clinical psychologists, internists, immunologists, and researchers in psychosomatic disorders should consider this an essential reference volume.

Macroeconomic Stability and Financial Regulation Mathias Dewatripont 2011 The G20 meeting in London in spring 2009 was a historical moment of global cooperation to deal with the global financial crisis. This book collects essays from leading economists, first presented as an eBook in January 2009, advocating many of the policies that were eventually agreed on, including the headline-grabbing global fiscal stimulus. But it goes further, calling for: Reforms to address global imbalances by a) creating insurance mechanisms for countries that forgo reserve accumulation and stimulate domestic expansion; and b) accelerating the development of financial systems in emerging markets. Macroeconomic policy to meet any threat of deflation promptly, with a zero interest rate policy and quantitative easing, and

an inflation target to avoid expectations of deflation. Adjustment of the Basel II capital requirements to mitigate procyclicality. Creation of a centralised clearing counterparty for credit default swap trades. Severing the link between credit rating agencies and issuers and monitoring the former's power. Establishment of a harmonised bankruptcy regime for banks that gives regulators strong powers over bank managers and shareholders before the bank is technically insolvent, especially in the case of cross-border banks. Creation of an International Financial Stability Fund that takes equity positions in the financial institutions of participating countries and monitors their activities. Many of these suggestions are still being debated today.

**Silent Hunter** Charles D. Taylor 2015-04-24 The Russians are converting the Arctic Ocean into a Soviet domain. The American response: IMPERATOR ... the most advanced weapon ever devised in submarine warfare. As large as an aircraft carrier, it glides silently along the ocean floor, and within it is a dazzling arsenal of weaponry, years ahead of Soviet technology. But the Russians only have one course of action: they must destroy IMPERATOR! *Butch Heroes* Ria Brodell 2018-10-30 Portraits and texts recover lost queer history: the lives of people who didn't conform to gender norms, from the fifteenth through the twentieth centuries. "A serious—and seriously successful—queer history recovery project." —Publishers Weekly Katherina Hetzeldorfer, tried "for a crime that didn't have a name" (same sex sexual relations) and sentenced to death by drowning in 1477; Charles aka Mary Hamilton, publicly whipped for impersonating a man in eighteenth-century England;

Clara, aka "Big Ben," over whom two jealous women fought in 1926 New York: these are just three of the lives that the artist Ria Brodell has reclaimed for queer history in *Butch Heroes*. Brodell offers a series of twenty-eight portraits of forgotten but heroic figures, each accompanied by a brief biographical note. They are individuals who were assigned female at birth but whose gender presentation was more masculine than feminine, who did not want to enter into heterosexual marriage, and who often faced dire punishment for being themselves. Brodell's detailed and witty paintings are modeled on Catholic holy cards, slyly subverting a religious template. The portraits and the texts offer intriguing hints of lost lives: cats lounge in the background of domestic settings; one of the figures is said to have been employed variously as "a prophet, a soldier, or a textile worker"; another casually holds a lit cigarette. Brodell did extensive research for each portrait, piecing together a life from historical accounts, maps, journals, paintings, drawings, and photographs, finding the heroic in the forgotten.

Global Public Goods Inge Kaul 2016-08-26 "Global public goods" has become one of the most influential concepts in current international relations research. This reader brings together 29 of the most authoritative papers on global public goods of the last years, from a variety of disciplinary perspectives, along with a comprehensive and insightful review article by Kaul, Blondin and Nahtigal. The book is an essential collection for both theorists and practitioners of global governance, covering areas as diverse as financial institutions, security, knowledge, health, areas beyond national jurisdiction, and global environmental change.' - Frank Biermann, Utrecht University, the Netherlands

OECD Economic Surveys Oecd 2014-03-10 OECD's 2014 Economic Survey of Poland examines recent economic developments, policies and prospects. Special chapters examine labour market and competition policies. Poland's overall economic performance has been impressive over the last decade, allowing living standards to converge steadily towards the EU average. Yet, the economy slowed abruptly in 2012-13. This Survey focuses on making the labour market work better and strengthening product-market competition as ways to foster firms' competitiveness, overcome strong demographic headwinds and boost both short- and longer-term economic prospects. While substantial progress has been made in these areas since the nineties, important weaknesses are still restraining the country's economic potential.

European Identity Ireneusz Paweł Karolewski 2006 Despite its unequalled history of success, the European Union is still far from its citizens. In the aftermath of the failed referenda on the European constitutional treaty in France and the Netherlands in the early summer of 2005, the EU is facing a severe crisis of trust. Hence, the questions arise: how much pressure can the community

tolerate in order to persist and what does hold it together in times of scarcity, conflict, danger, and threat? The contributions of this volume do not only provide a variety of conceptualizations of European identity in the broad field of social sciences such as sociology, political theory and international relations, but first and foremost intend to enrich the present research by offering new theoretical perspectives and recent empirical findings.
