Peacemonger Marrack Goulding 2003 In 1986, British diplomat Marrack Goulding became the Under-Secretary-General of the United Nations in charge of peacekeeping. Since 1978, no new peacekeeping operations had been launched, while

existing ones in the Middle East, Cyprus, and Kashmir had stagnated. During the following seven years, however, Goulding presided over sixteen new missions, including highly controversial efforts in Angola, Yugoslavia, and Somalia. Goulding's historic tenure coincided with a dramatic shift in

attitude within the UN about its role in ending regional conflicts. In *Peacemonger*, he provides an unprecedented insider's account of the organization's successes and failures in this period. From the UN's unwieldy bureaucracy and its often uneasy relationship with member states to the individual courage of many of its officials and their frequently unsung achievements, Goulding details the UN's responses to the crises of the post--Cold War world. He offers frank portraits of Javier Perez de Cuellar and Boutros Boutros-Ghali, the two Secretaries-General under whom he worked, and chronicles the internal strife that undermined the UN's efficiency. He also documents the development during his watch of new types of peacekeeping missions that did far more than preside over ongoing and irresolvable conflicts. In Namibia, Cambodia, and Central America, UN peacekeepers facilitated democratic elections and the

demobilization of belligerents. Dispassionate, perceptive, and unblinkingly honest, *Peacemonger* offers vital insights into the UN's most perilous and contentious activity.

Educating for Intelligent Belief or Unbelief Nel Noddings 1993 One of the most enduring and controversial issues in American education concerns the place of individual beliefs and moral standards in the classroom. Noddings argues that public schools should address the fundamental questions that teenagers inevitably raise about the nature, value and meaning of life (and death), and to do so across the curriculum without limiting such existential and metaphysical discussions to separate religion, philosophy or even history classes. Explorations of the existence of a God or gods, and the value and validity of religious belief for societies or individuals, she writes “whether they are initiated by students or teachers, should be part of the free

exchange of human concerns—a way in which people share their awe, doubts, fears, hopes, knowledge and ignorance.” Such basic human concerns, Noddings maintains, are relevant to nearly every subject and should be both non-coercive and free from academic evaluation. “Nel Noddings probes the many ways in which children’s questions about God and gods, existence, and the meaning of life can and should be integrated into life in classrooms and the real world of the public schools.” —From the Foreword “This is a rich and sensitive book that will give teachers, administrators, parents, philosophers of education—any concerned citizen—the basis for more substantial discussion and concrete proposals.” —Free Inquiry “Impressive in its sweep of possibilities for exploration in the school curriculum and teacher education.” —Educational Theory

The Idea of Education 2021-11-15 This book represents a ‘position statement’ from the intellectually vibrant and challenging debate that emanated from the inaugural conference project launch entitled 'The Idea of Education' held at Mansfield College, Oxford in July 2002. The book conveys a wide spectrum of views about 'the idea of education' in recognition of the fact that 'the idea' is not as straightforward as it may appear on the surface. It seems the universities are not alone in this apparent uncertainty of definition. Further Education seems equally nonplussed as regard its purpose or *raison d'être*. Furthermore, even for those within the sector, it appears to be a point of much contention as to where Further Education

ends and Higher Education begins. The book is divided into three main sections: The Current Structures of Education, Issues within Contemporary Education and The Ambitions of Education. The chapters wrestle, sometimes at variance with each other, with the paradoxes and concerns felt by each writer grappling with the idea of education.

Icon and Idea Herbert Edward Read, Sir 2013-10-01

James May's 20th Century James May 2007

Published to tie in with the BBC TV series, this is James May's idiosyncratic look at the great inventions of our time. He explores the iconic themes of the 20th century, including flight, space travel, television, mechanised war, medicine, video games, skyscrapers, electronic music, and more.

David Starkey's Music and Monarchy David Starkey 2013-07-04 For the kings and queens of England, a

trumpet fanfare or crash of cymbals could be as vital a weapon as a cannon. Showcasing a monarch's power, prestige and taste, music has been the lifeblood of many a royal dynasty. From sacred choral works to soaring symphonies, *Music and Monarchy* looks at how England's character was shaped by its music. To David Starkey and Katie Greening, works like Handel's *Water Music* and Tallis's *Mass for Four Voices* were more than entertainment – they were pieces signalling political intent, wealth and ambition. Starkey and Greening examine England's most iconic musical works to demonstrate how political power has been a part of musical composition for centuries. Many of our current musical motifs of nationhood, whether it's the Last Night of the Proms or football terraces erupting in song, have their origins in the way the crown has shaped the national soundtrack.

Published to coincide with a major BBC series,

Music and Monarchy is not a book about music. It is a history of England written in music, from our leading royal historian.

A Song for Will Hilary Robinson 2016-12

The Black Cliffs Gunnar Gunnarsson 1967 "This novel, written in 1928, based on a true crime which took place in 1802 in Iceland, deals with two couples who lived on an isolated farm. One of the husbands disappears, and when the wife of the other dies, the survivors are arrested and tried for murder. It is an oddly powerful book, since Gunnarsson infuses the stark circumstances of the crime with the sense of harsh existence there and man's trials before God as well as other men. The narrator is a young and inexperienced curate, who is forced to confront the rumors and then the actuality of the two murders. The story is deepened as seen through the curate's fear and compassion, and the untenable situation at the farm is revealed only slowly through the slight testimony of the trial witnesses. And spiritual

overtones strengthen the story, so that one remembers not only the uncertainties of those involved but the way in which their actions and emotions create almost elemental conflicts."--Kirkus

Resistance and Renewal Celia Haig-Brown

2002-07-01 One of the first books published to deal with the phenomenon of residential schools in Canada, *Resistance and Renewal* is a disturbing collection of Native perspectives on the Kamloops Indian Residential School (KIRS) in the British Columbia interior. Interviews with thirteen Natives, all former residents of KIRS, form the nucleus of the book, a frank depiction of school life, and a telling account of the system's oppressive environment which sought to stifle Native culture.

Poetics of Change Julio Ortega 2013-08-26 Too often literary criticism is academic exercise rather than creative act. For the multifaceted Julio Ortega—respected poet, dramatist, and novelist in his own right—the act of criticism becomes profoundly creative, his incisive readings of the text far transcending the pedantry that may falsely pass for imagination, intelligence, and rigor. Nearly every Spanish-American writer of consequence, from Paz to Fuentes, Cortázar to Lezama Lima, has extolled Ortega's criticism as not merely a reflection but an essential part of the renaissance that took place in Spanish-American letters during the late twentieth century. *Poetics of Change* brings together Ortega's most penetrating and insightful analyses of the fiction of Borges, Fuentes, García Márquez, Carpentier, Rulfo, Cabrera Infante, and others responsible for great writing from Spanish America. Ortega concerns himself most with the

semantic innovations of these masters of the modern narrative and their play with form, language, and the traditional boundaries of genre. Mapping their creative territory, he finds that the poetics of Spanish-American writing is that of a dynamically changing genre that has set exploration at its very heart.

Is it (Still) Mostly Fiscal? Determinants of Sovereign Spreads in Emerging Markets Mr.Amine Mati 2008-11-01 Using a panel of 30 emerging market economies from 1997 to 2007, this paper investigates the determinants of country risk premiums as

measured by sovereign bond spreads. Unlike previous studies, the results indicate that both fiscal and political factors matter for credit risk in emerging markets. Lower levels of political risk are associated with tighter spreads, while efforts at fiscal consolidation narrow credit spreads, especially in countries that experienced prior defaults. The composition of fiscal policy matters: spending on public investment contributes to lower spreads as long as the fiscal position remains sustainable and the fiscal deficit does not worsen.

Anti-Americanism in Russia: From Stalin To Putin

Eric Shiraev 2000-12-01 Shiraev and Zubok analyze growing anti-Americanism in Russia, now high again after several years of "honeymoon" with the United States. An evaluation of this phenomenon is significant for assessments of current and future international developments and especially some "worst-case scenarios" in light of further steps towards European integration, NATO expansion, and of future regional conflicts. This analysis is also crucial for theoretical and popular discussions about the course of democratic transition, as well as the practical aspects of the nature of relations between democracies. Shiraev and Zubok investigate to what extent Russian anti-Americanism is a phenomenon

of a democratic polity and thus challenges a quite popular "democratic peace" thesis stating that spread of democracy makes international tension and conflicts far less frequent and profound.

Spinning Side Kick Anita Lahey 2011 Anita

Lahey's second collection, *Spinning Side Kick*, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim.

Adolescents' Future-orientation Janusz Trempała 2002 The primary focus of this volume is on the adolescents' ability to direct their thoughts and

actions towards the future and to create mental construals of hypothetical future events: present images, wishes, hopes, fears and plans regarding action-goals in the future. The major aim is to understand how young people construct their future-oriented goals and the plans related to them as a means of navigating into adulthood, how these efforts are determined by their previous life history, and the extent to which they think future-orientation will influence their later lives. The contributions included in this volume take one further step towards a full understanding of these complex mechanisms.

"This volume is . . . devoted to the question of how 'gender' is and (especially) should be, conceptualized in personality theory and research. It was designed for students and researchers. The idea . . . grew out of our conviction that 'gender' has played a curious and paradoxical role in personality theory and research to date."--from the Introduction
