Kursy/yes Spb

If you ally infatuation such a referred **kursy/yes spb** ebook that will have enough money you worth, get the enormously best seller from us currently from several preferred authors. If you want to funny books, lots of novels, tale, jokes, and more fictions collections are as well as launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all book collections kursy/yes spb that we will enormously offer. It is not in this area the costs. Its practically what you craving currently. This kursy/yes spb, as one of the most energetic sellers here will certainly be along with the best options to review.

Coping with Lack of Control in a Social World Marcin Bukowski 2016-11-03 Coping with Lack of Control in a Social World offers an integrated view of cutting-edge research on the effects of control deprivation on social cognition. The book integrates multi-method research demonstrating how various types of control deprivation, related not only to experimental settings but also to real life situations of helplessness, can lead to variety of cognitive and emotional coping strategies at the social cognitive level. The comprehensive analyses in this book tackle issues such as: Cognitive, emotional and socio-behavioral reactions to threats to personal control How social factors aid in coping with a sense of lost or threatened control Relating uncontrollability to powerlessness and intergroup processes How lack of control experiences can influence basic and complex cognitive processes This book integrates various strands of research that have not yet been presented together in an innovative volume that addresses the issue of reactions to control loss in a socio-psychological context. Its focus on coping as an active way of confronting a sense of uncontrollability makes this a unique, and highly original, contribution to the field. Practicing psychologists and students of psychology will be particularly interested readers.

America and the Great War D. Clayton James 2014-09-12 In America and the Great War, 1914-1920, the accomplished writing team of D. Clayton James and Anne Sharp Wells provides a succinct account of the principal military, political, and social developments in United States History as the nation responded to, and was changed by, a world in crisis. A forthright examination of America's unprecedented military commitment and actions abroad, America and the Great War includes insights into the personalities of key Allied officers and civilian leaders as well as the evolution of the new American "citizen soldier." Full coverage is given to President Wilson's beleaguered second term, the experience of Americans-including women, minorities, and recent arrivals-on the home front, and the lasting changes left in the Great War's wake.

Cyberfactories Barbara Czarniawska-Joerges 2011-01-01 ÔOnly the polyglott Barbara Czarniawska, a keen ethnographer of organizations, could

give us a picture of the production of news in the age of digital reproduction. By a close description of the process through which news agencies elaborate this exquisitely complex product Ð the piece of news Ð she manages to give us a realistic interpretation of what technology and globalization do to journalism. Far from indicating the end of the trade and the dissolution of its credibility, her careful and witty account shows the many ways in which authority of information may be regained. Walter Lippmann would have loved this book.Õ Ð Bruno Latour, Sciences Po Paris, France ÔTT, Ansa, Reuters are not intermediaries that transfer information to their clients, rather they are producers of the news. . . or better, in this book, they are fac(s)tories. This passionate journey into the management of overflow of news input and output starts with the question: when a flow is an overflow? How do people daily survive such overflow? Read the book and discover how the answer is simpler than expected!Õ Ð Silvia Gherardi, University of Trento, Italy Have you ever wondered how organizations decide which news is important? This insightful book portrays in detail everyday work in three news agencies: Swedish TT, Italian ANSA and the worldwide Reuters. This unique study is about organizing rather than journalism, revealing two accelerating phenomena: cybernization (machines play a more and more central role in news production) and cyborgization (people rely more and more on machines). Barbara Czarniawska reveals that technological developments lead to many unexpected consequences and complications. Cyberfactories will prove essential to researchers interested in contemporary forms of organizing, studies of technology, and media. It will also appeal to a lay reader interested in how news is produced.

Bee Journal Animalz Press 2019-08-12 This is great as a journal perfect for you to write your own thoughts, get a little creative with poetry or just writing down lists or ideas;It is a 110 pages blank ruled journal;ready for you to fill with your own writing and get a little creative every now and then. 110 pages of high quality paper It can be used as a journal, notebook or just a composition book 6" x 9" Paperback notebook Great size to carry everywhere in your bag, for work, high school, college

Soviet Ukrainian Dissent Jaro Bilocerkowycz 2019-07-11 In this book, the author focuses on an important variant of Soviet dissent from 1963 through March 1985; to deepen understanding of the phenomena of political alienation and dissent; and to stimulate further study of political dissent in the USSR and elsewhere.

Stress Out Christopher Pitt 2010 Are you stressed? Bigger than swine flu, and infinitely more deadly, stress is the emotional pathogen that eventually touches us all. It is the modern pandemic, costing the world billions of dollars every year, and seems to have a hand in almost every disease, from insomnia to cancer, flatulence to strokes.As Hans Selye, the pioneer of stress research, so aptly said, ¿Everyone knows what stress is, but nobody really knows.¿ If you are stressed, then you know what it feels like. Yet we often don¿t understand the source of our stress, or what that stress is doing to us, physically, emotionally or spiritually. And we usually don¿t know how to fix our stress either - to take control back and reduce our stress levels, or harness the stress to help us live fuller lives.This book is not a sure-fire, quick-fix,

seven step process that will adjust your aura or realign your chi. It is not meant to be a new set of curtains for your crumbling psyche. But it will help you rebuild your coping skills and overcome old stressors, future problems, and the inevitable failure that comes with making long-term life changes.Immunize yourself against the emotional pathogen of stress. You will live a healthier, productive and more meaningful life, where you will truly experience life abundantly!

Paranoid Transformer Aleksey Tikhonov 2020-08-18 The diary of Paranoid Transformer is the output of interactions between a series of neural networks. Mysterious, humorous, dark and sometimes intelligible, Paranoid Transformer points to new frontiers to "not only what can be achieved aesthetically by the plethora of contemporary deep learning techniques, but also the scope for human creativity in harnessing these AI tools for advancing the arts." -- Luba Elliott.

The Women's Liberation Movement in Russia Richard Stites 2021-07-13 Richard Stites views the struggle for liberation of Russian women in the context of both nineteenth-century European feminism and twentieth-century communism. The central personalities, their vigorous exchange of ideas, the social and political events that marked the emerging ideal of emancipation--all come to life in this absorbing and dramatic account. The author's history begins with the feminist, nihilist, and populist impulses of the 1860s and 1870s, and leads to the social mobilization campaigns of the early Soviet period.

Why are Women Redundant? William Rathbone Greg 1869 An essay revealing concerns for the "superfluous" woman who remained single in the 19th century.

Merchant Moscow James L. West 2014-07-14 With the collapse of the Soviet system, the long-neglected history of the early capitalists is being recovered and rewritten. Once regarded as the "losers" in the Russian Revolution, these merchants can now be seen as early pioneers in Russia's transformation to a free market economy. This book is the first joint Russian-American collaborative project on the history of Russian entrepreneurship. Merchant Moscow puts a human face on early Russian capitalism. It presents thematic groupings of historic photographs paired with commentaries by contemporary Russian and American historians. The pictures provide a stunning, wide-ranging visual portrait of Imperial Russia's most influential entrepreneurial elite, the Moscow merchantry, while the accompanying articles interpret the photographs and place them in the larger cultural context of prerevolutionary Russia. Here is a surprising new view of the bourgeoisie during the Silver Age, revealed for the first time in this fascinating volume. The fourteen contributing historians selected and ordered photographs that best illustrate their specialized knowledge of the period. They have framed their topics in a variety of ways. Some have chosen to pursue traditional topics, such as collective biography, institutional history, or the history of business practices. Others have approached the photographs in more experimental ways, emphasizing the semiotics of dress, discourses of identity, or the history of daily life. Together they offer fresh perspectives on the successes and failures of Russia's first experiment with entrepreneurial capitalism. Originally published in 1998. The Princeton Legacy Library uses the latest print-on-demand

technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Late Stalinism Evgeny Dobrenko 2020-07-14 How the last years of Stalin's rule led to the formation ofan imperial Soviet consciousness In this nuanced historical analysis of late Stalinism organized chronologically around the main events of the period—beginning with Victory in May 1945 and concluding with the death of Stalin in March 1953—Evgeny Dobrenko analyzes key cultural texts to trace the emergence of an imperial Soviet consciousness that, he argues, still defines the political and cultural profile of modern Russia.

Future of Jobs IntroBooks Team Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in

several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents Introduction Section One: Windows Configuration Chapter 1: AlwaysInstallElevated Section Two: Domain Controller Chapter 2: Zerologon Section Three: Windows

Service Chapter 3: Service - Insecure File Permission Chapter 4: Service - Unquoted Path Chapter 5: Service - Bin Path Chapter 6: Service - Registry Chapter 7: Service - DLL Hijacking Section Four: Scheduled Tasks Chapter 8: Scheduled Tasks Section Five: Windows Registry Chapter 9: Autorun Chapter 10: Startup Applications Section Six: Windows Kernel Chapter 11: Kernel - EternalBlue Chapter 12: Kernel - MS15-051 Chapter 13: Kernel - MS14-058 Section Seven: Potato Exploits Chapter 14: Juicy Potato Chapter 15: Rogue Potato Section Eight: Password Mining Chapter 16: Password Mining - Memory Chapter 17: Password Mining - Registry Chapter 18: Password Mining - SiteList Chapter 19: Password Mining - Unattended Chapter 20: Password Mining - Web.config Section Nine: UAC Bypass Chapter 21: User Account Control Bypass For more information, please visit http://www.howtopassoscp.com/.

Empowering Learners With Mobile Open-Access Learning Initiatives Mills, Michael 2017-01-05 Education has been progressing at a rapid pace ever since educators have been able to harness the power of mobile technology. Open-access learning techniques provide more students with the opportunity to engage in educational opportunities that may have been previously restricted. Empowering Learners With Mobile Open-Access Learning Initiatives is an authoritative reference source that offers an engaging look at how mobile technologies are aiding educators in providing new, innovative ways to enhance student learning experiences. Featuring relevant topics such as switch access technology, digital portfolios, dual enrollment students, and place conscious education, this is a reliable resource for academicians, educators, students, and practitioners that are interested in studying recent mobile education advancements.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Abelard to Apple Richard A. Demillo 2011-08-26 How institutions of higher learning can rescue themselves from irrelevance and marginalization in the age of iTunes U and YouTube EDU. The vast majority of American college students attend two thousand or so private and public institutions that might be described as the Middle—reputable educational institutions, but not considered equal to the elite and entrenched upper echelon of the Ivy League and other prestigious schools. Richard DeMillo has a warning for these colleges and universities in the Middle: If you do not change, you are heading for irrelevance and marginalization. In Abelard to Apple, DeMillo argues that these institutions, clinging precariously to a centuries-old model of higher education, are ignoring the social, historical, and economic forces at work in today's world. In the age of iTunes, open source software, and for-profit online universities, there are new rules for higher education. DeMillo, who has spent years in both academia and in industry, explains how higher education arrived at its current parlous state and offers a road map for the twenty-first century. He describes the evolving

model for higher education, from European universities based on a medieval model to American land-grant colleges to Apple's iTunes U and MIT's OpenCourseWare. He offers ten rules to help colleges reinvent themselves (including "Don't romanticize your weaknesses") and argues for a focus on teaching undergraduates. DeMillo's message—for colleges and universities, students, alumni, parents, employers, and politicians—is that any college or university can change course if it defines a compelling value proposition (one not based in "institutional envy" of Harvard and Berkeley) and imagines an institution that delivers it.

The International Critical Thinking Reading and Writing Test Richard Paul 2019-06-01 This essay-based test assesses the extent to which students have acquired the reading and writing abilities required for skilled analysis and evaluation. Developed by the Foundation for Critical Thinking, the test is designed for secondary and higher education students and fosters close reading and substantive writing abilities.

High Integrity Software John Gilbert Presslie Barnes 2003 This book provides an accessible introduction to the SPARK programming language. Updated 'classic' that covers all of the new features of SPARK, including Object Oriented Programming. The only book on the market that covers this important and robust programming language. CD-ROM contains the main SPARK tools and additional manuals giving all the information needed to use SPARK in practice. Technology: The SPARK language is aimed at writing reliable software that combines simplicity and rigour within a practical framework. Because of this, many safety-critical, high integrity systems are developed using SPARK. User Level: Intermediate

Audience: Software engineers, programmers, technical leaders, software managers. Engineering companies in fields such as avionics, railroads, medical instrumentation and automobiles. Academics giving MSc courses in Safety Critical Systems Engineering, System Safety Engineering, Software Engineering. Author Biography: John Barnes is a veteran of the computing industry. In 1977 he designed and implemented the RTL/2 programming language and was an original member of the ADA programming language design team. He was founder and MD of Alsys Ltd from 1985 to 1991. Currently self employed, John is the author of 'Programming in ADA' which has sold 150000 copies and been translated into 6 languages.

The Electrification of Russia, 1880–1926 Jonathan Coopersmith 2016-11-01 The Electrification of Russia, 1880–1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith's narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

Corporate Blogging For Dummies Douglas Karr 2010-07-13 Establish a successful corporate blog to reach

your customers Corporate blogs require careful planning and attention to legal and corporate policies in order for them to be productive and effective. This fun, friendly, and practical guide walks you through using blogging as a first line of communication to customers and explains how to protect your company and employees through privacy, disclosure, and moderation policies. Blogging guru Douglas Karr demonstrates how blogs are an ideal way to offer a conversational and approachable relationship with customers. You'll discover how to prepare, execute, establish, and promote a corporate blogging strategy so that you can reap the rewards that corporate blogging offers. Shares best practices of corporate blogging, including tricks of the trade, what works, and traps to avoid Walks you through preparing a corporate blog, establishing a strategy, promoting that blog, and measuring its success Reviews the legalities involved with a corporate blog, such as disclaimers, terms of service, comment policies, libel and defamation, and more Features examples of successful blogging programs throughout the book Corporate Blogging For Dummies shows you how to establish a corporate blog in a safe, friendly, and successful manner.
Integrating Engineering Education and Humanities for Global Intercultural Perspectives Zhanna Anikina 2020-05-06 This book presents papers from the International Conference on Integrating Engineering Education and Humanities for Global Intercultural Perspectives (IEEHGIP 2020), held on 25–27 March 2020. The conference brought together researchers and practitioners from various disciplines within engineering and humanities to offer a range of perspectives. Focusing on, but not

limited to, Content and Language Integrated Learning (CLIL) in Russian education the book will appeal to a wide academic audience seeking ways to initiate positive changes in education.
Overcoming School Refusal Joanne Garfi 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal
Refined Carbohydrate Foods And Disease D Burkitt 2012-12-02 Refined Carbohydrate Foods and Disease: Some Implications of Dietary Fibre addresses the geographical distribution and historical emergence of the characteristically western diseases, which may be accounted for on a common dietary basis,

particularly, on deficiency of dietary fiber. The book is divided into 10 parts, each with number of chapters focusing on relationship between disease and the environment; refined carbohydrate foods; various diseases of the large intestine; and other diseases that are associated with constipation, straining at stool, and refined carbohydrate foods. The book shows the role of refined carbohydrate foods as a significant cause of diseases, because it removes fiber, which has many unsuspected physiological functions. This reference is deemed to be useful to forge stronger links between epidemiologists and experimental workers.

The Role of Technology in CSCL Ulrich H. Hoppe 2007-06-26 This book relates contemporary information and communication technologies (ICT) to their specific teaching and learning functions, including how ICT is appropriated for and by educational or learning communities. The technological "hot spots" of interest in this book include: groupware or multi-user technologies such as group archives or synchronous co-construction environments, embedded interactive technologies in the spirit of ubiquitous computing, and modeling tools based on rich representations.

World Food and Agriculture - Statistical Yearbook 2020 Food and Agriculture Organization of the United Nations 2020-10-20 This publication offers a synthesis of the major factors at play in the global food and agricultural landscape. Statistics are presented in four thematic chapters, covering the economic importance of agricultural activities, inputs, outputs and factors of production, their implications for food security and nutrition and their impacts on the environment. The Yearbook is meant to constitute a primary tool for policy makers, researchers and analysts, as well as the general public interested in the past, present and future path of food and agriculture.

Women in the Khrushchev Era M. Ilic 2004-02-27 This collection of essays examines women in the Khrushchev era, using both newly-accessible archival material and a re-reading of published sources. Exploring diverse subjects including housing, space flight, women workers, cinema, religion and consumption, the volume places the analysis of specific events or issues within a broader discussion of economic, political, ideological and international developments to provide a full analysis of the era.

Social Identity in Imperial Russia Elise Kimerling Wirtschafter 2015-05-31 How did enlightened Russians of the eighteenth century understand society? And how did they reconcile their professed ideals of equality and justice with the authoritarian political structures in which they lived? Historian Elise Wirtschafter turns to literary plays to reconstruct the social thinking of the past and to discover how Enlightenment Russians understood themselves. Opening with an illuminating discussion of the development of theater in eighteenth-century Russia, Wirtschafter goes on to explore dramatic representations of key social questions. Based on an examination of nearly 300 secular plays written during the last half of the century, she shows how dramas for the stage represented and debated important public issues such as the nature of the common good, the structure of the patriarchal household, the duty of monarchs, and the role of the individual in society. Wirtschafter presents a striking reconstruction of the way educated Russians conceptualized a

society beyond the immediate spheres of household and locality. Seeking to highlight problems of "social consciousness," she asks what Enlightenment Russians thought about social experience and how their ideas related to actual social relationships in a society organized around serfdom and absolute monarchy. She portrays Russian Enlightenment culture on its own terms, while at the same time shedding light on broader problems of social order and political authority in imperial Russia."

The Psychology of Extremism Arie W. Kruglanski 2021-09-13 This ground-breaking book introduces a new model of extremism that emphasizes motivational imbalance among individual needs, offering a unique multidisciplinary exploration of extreme behaviors relating to terrorism, dieting, sports, love, addictions, and money. In popular discourse, the term 'extremism' has come to mean largely 'violent extremism', but this is just one of many different types: extreme sports, extreme diets, political and religious extremisms, extreme self-interest, extreme attitudes, extreme devotion to a cause, addiction to substances, or behavioral addiction (to videogames, shopping, pornography, sex, and work). But do these descriptions have a deeper meaning? Do they reveal a common psychological dynamic? Or are they merely a mode of things about phenomena that have little in common? Bringing together world-leading psychologists from a variety of disciplines, the book uses a brand-new model to examine different expressions of extremism, at different levels of analysis (brain, hormones, and behavior), in order not merely to describe such behaviors but also to explain their occurrence, and the conditions under which they may

be likely to emerge. Also including suggestions for ways in which extremism could be counteracted, and to what extent it appears to be harmful to individuals and society, this is essential reading for students and academics in psychology and behavioral sciences.

The Psychology of Tolerance in Times of Uncertainty Malgorzata Kossowska 2020-04-17 This unique book lays out the motivational basis for tolerance, the most important underlying factor that shapes people's social attitudes and determines our ability to get along with others. Closed- or open-mindedness distinguishes people open to information and new ideas, prepared to change their views, from people who are rigidly attached to their convictions and resistant to the unknown. Demonstrating how the mechanism underlying closed-mindedness is rooted in uncertainty and fear, with the fundamental consequence of closed-mindedness being intolerance, the author shows how basic features of human psychology drive large-scale socio-political developments that determine the fate of peoples and nations. Kossowska argues that recent political events across Europe, including the popularity and rise of extreme right-wing groups, are no longer adequately explained by traditional distinctions like people versus the elite, religion versus no religion, left versus right. Exploring how this can provide knowledge to increase the capability of people, groups, or societies to improve their lives in an era of uncertainty created by economic and political turmoil, the book also focuses on discussing ways to make people more open, thus tolerant. Written from a psychological perspective, this is an ideal resource for students and academics in psychology and social and

political science, as well as anybody interested in understanding psychological mechanisms of intolerance.

Ingmar Bergman Ingmar Bergman 2007 The critically acclaimed film director discusses various stages of his career and the many facets of his work in a collection of interviews that begins with a 1957 piece and ends in 2002 as he was preparing to direct his latest film, featuring conversations with James Baldwin, Michiko Kakutani, John Simon, and Vilgot Sjöman, among others. Simultaneous.

Anonymous Sex Hillary Jordan 2022-02-03 · A married woman has a BDSM-tinged encounter at a work conference · Two young boys on a sleepover feel the first stirrings of desire · In an artificially generated afterlife, anything can be sexual if you want it to be · A young widow on a sleeper train shelters a criminal in her carriage · A bisexual woman cheats on her wife with a baker

Rock in the Reservation Yngvar Bordewich Steinholt 2004

Against All Odds Eva Kaufholz-Soldat 2020-07-29 This book presents an overview of the ways in which women have been able to conduct mathematical research since the 18th century, despite their general exclusion from the sciences. Grouped into four thematic sections, the authors concentrate on well-known figures like Sophie Germain and Grace Chisholm Young, as well as those who have remained unnoticed by historians so far. Among them are Stanisława Nidodym, the first female students at the universities in Prague at the turn of the 20th century, and the first female professors of mathematics in Denmark. Highlighting individual biographies, couples in science, the situation at specific European universities, and sociological factors influencing

specific careers from the 18th century to the present, the authors trace female mathematicians' status as it evolved from singular and anomalous to virtually commonplace. The book also offers insights into the various obstacles women faced when trying to enter perhaps the "most male" discipline of all, and how some of them continue to shape young girls' self-perceptions and career choices today. Thus, it will benefit scholars and students in STEM disciplines, gender studies and the history of science; women in science, mathematics and at institutions, and those working in mathematics education.

Bauhaus Futures Laura Forlano 2019-10-22 Essays, photo-essays, interviews, manifestos, diagrams, and a play explore the varied legacies, influences, and futures of the Bauhaus. What would keep the Bauhaus up at night if it were practicing today? A century after its founding by Walter Gropius in Weimar, Germany, as an "experimental laboratory of the future," who are the pioneering experimentalists who reinscribe or resist Bauhaus traditions? This book explores the varied legacies, influences, and futures of the Bauhaus. Many of the animating issues of the Bauhaus—its integration of research, teaching, and practice; its experimentation with materials; its democratization of design; its open-minded, heterogeneous approach to ideas, theories, methods, and styles—remain relevant. The contributors to Bauhaus Futures address these but go further, considering issues that design has largely ignored for the last hundred years: gender, race, ethnicity, class, sexuality, and disability. Their contributions take the form of essays, photo-essays, interviews, manifestos, diagrams, and even a play. They discuss, among other

things, the Bauhaus curriculum and its contemporary offshoots; Bauhaus legacies at the MIT Media Lab, Black Mountain College, and elsewhere; the conflict between the Bauhaus ideal of humanist universalism and current approaches to design concerned with race and justice; designed objects, from the iconic to the precarious; textile and weaving work by women in the Bauhaus and the present day; and design and technology. Contributors Alice Arnold, Jeffrey Bardzell, Shaowen Bardzell, Karen Kornblum Berntsen, Marshall Brown, Stuart Candy, Jessica Charlesworth, Elizabeth J. Chin, Taeyoon Choi, B. Coleman, Carl DiSalvo, Michael J. Golec, Kate Hennessy, Matthew Hockenberry, Joi Ito, Denisa Kera, N. Adriana Knouf, Silvia Lindtner, Shannon Mattern, Ramia Mazé, V. Mitch McEwen, Oliver Neumann, Paul Pangaro, Tim Parsons, Nassim Parvin, Joanne Pouzenc, Luiza Prado de O. Martin, Daniela K. Rosner, Natalie Saltiel, Trudi Lynn Smith, Carol Strohecker, Alex Taylor, Martin Thaler, Fred Turner, Andre Uhl, Jeff Watson, Robert Wiesenberger

Higher Education in Russia Yaroslav Kuzminov 2022-09-13 Higher Education in Russia is a must-read for scholars of higher education and Russian history alike.

Workers and Intelligentsia in Late Imperial Russia Reginald E. Zelnik 1999

Postwar Polish Poetry Czeslaw Milosz 1983-07-08 This expanded edition of Postwar Polish Poetry (which was originally published in 1965) presents 125 poems by 25 poets, including Czeslaw Milosz and other Polish poets living outside Poland. The stress of the anthology is on poetry written after 1956, the year when the lifting of censorship and the berakdown of doctrines provoked and explosion of new schools and talents. The victory of Solidarity in August 1980 once again opened new vistas for a short time; the coup of December closed that chapter. It is too early yet to predict the impact these events will have on the future of Polish poetry.

Linux TCP/IP Network Administration Scott Mann 2001 A thorough guide to Linux TCP/IP network adminstration examines the major flavors of Linux; covers routing, file management, directory services, e-mail, security, and internetworking with Samba; and provides implementation examples, troubleshooting tips, and much more. Original. (Advanced).

Control Motivation and Social Cognition Gifford Weary 2012-12-06 Over the past two decades theorists and researchers have given increasing attention to the effects, both beneficial and harmful, of various control related motivations and beliefs. People's notions of how much personal control they have or desire to have over important events in their lives have been used to explain a host of performance and adaptational outcomes, including motivational and performance deficits associated with learned helplessness (Abramson, Seligman, & Teasdale, 1978) and depression (Abramson, Metalsky, & Alloy, 1989), adaptation to aging (Baltes & Baltes, 1986; Rodin, 1986), cardiovascular disease (Matthews, 1982), cancer (Sklar & Anisman, 1979), increased reports of physical symptoms (Pennebaker, 1982), enhanced learning (Savage, Perlmutter, & Monty, 1979), achievement-related behaviors (Dweck & Licht, 1980; Ryckman, 1979), and post abortion adjustment (Mueller & Major, 1989). The notion that control motivation plays a fundamental role in a variety of basic, social psychological processes also has a long historical tradition. A number of theorists (Heider, 1958; Jones & Davis, 1965; Kelley, 1967), for

example, have suggested that causal inferences arise from a desire to render the social world predictable and controllable. Similarly, control has been implicated as an important mediator of cognitive dissonance (Wicklund & Brehm, 1976) and attitude phenomena (Brehm & Brehm, 1981; Kiesler, Collins, & Miller, 1969). Despite the apparent centrality of control motivation to a variety of social psychological phenomena, until recently there has been relatively little research explicitly concerned with the effects of control motivation on the cognitive processes underlying such phenomena (cf.

Becoming Muslim in Imperial Russia Agnès Nilüfer Kefeli 2014-12-18 In the nineteenth century, the Russian Empire's Middle Volga region (today's Tatarstan) was the site of a prolonged struggle between Russian Orthodoxy and Islam, each of which sought to solidify its influence among the frontier's mix of Turkic, Finno-Ugric, and Slavic peoples. The immediate catalyst of the events that Agnès Nilüfer Kefeli chronicles in Becoming Muslim in Imperial Russia was the collective turn to Islam by many of the region's Kräshens, the Muslim and animist Tatars who converted to Russian Orthodoxy between the sixteenth and eighteenth centuries. The traditional view holds that the apostates had really been Muslim all along or that their conversions had been forced by the state or undertaken voluntarily as a matter of convenience. In Kefeli's view, this argument vastly oversimplifies the complexity of a region where many participated in the religious cultures of both Islam and Orthodox Christianity and where a vibrant Kräshen community has survived to the present. By analyzing Russian, Eurasian, and Central Asian ethnographic, administrative, literary, and missionary sources, Kefeli shows how traditional education, with Sufi mystical components, helped to Islamize Finno-Ugric and Turkic peoples in the Kama-Volga countryside and set the stage for the development of modernist Islam in Russia. Of particular interest is Kefeli's emphasis on the role that Tatar women (both Kräshen and Muslim) played as holders and transmitters of Sufi knowledge. Today, she notes, intellectuals and mullahs in Tatarstan seek to revive both Sufi and modernist traditions to counteract new expressions of Islam and promote a purely Tatar Islam aware of its specificity in a post-Christian and secular environment.
